Daily Model Brief, October 19, 2026

MiniMax launched MiniMax-M3.1-Flash at $0.15 input and $0.60 output per million tokens, DeepSeek set November 1 as the billing start for search and fetch calls made through coding tools, and no vendor changed an existing token price since Friday.

Monday, October 19, 2026 · Prices as of 8:36 AM CT

Executive Summary

No vendor changed an existing chat or token price between Friday morning and this morning, weekend included. Meta's Muse Wonder (`muse-wonder-1.0`), Google's Gemini 4 Argon (`gemini-4-argon`), TypeSafe's Jev models and Anthropic's Claude Opus 5.5 fast mode are unchanged from Friday.

MiniMax released MiniMax M3.1 Flash (`MiniMax-M3.1-Flash`) today, an open-weight model it calls ultra-efficient for everyday work. Price: $0.15 input, $0.015 cached and $0.60 output per million tokens, half the standard MiniMax-M3 input and output rates, with up to a 1,000,000-token context window. MiniMax removed the M2.7, M2.5, M2.1 and M2 price tables from its pricing page.

DeepSeek set the billing start for its Search and Fetch APIs. Server-side search and fetch calls made through DeepSeek Harness, Claude Code or Codex are free until midnight Beijing time on November 1, which is 11:00 AM CT on Saturday, October 31; after that they bill at $0.75 per 1,000 successful requests each. Separately, deepseek-flash is now served by an upgraded model, DeepSeek-V4.1-Flash-1017, at unchanged prices.

Perplexity's Decisions API now lists `pplx-decider-v1.2` at $0.02 and a new `pplx-decider-flash-v1.2` at $0.01 per million input tokens, with output free. The older 27B decider names now point to v1.2. Cohere renamed North Small Translate to `north-small-translate-09-2026`, with no published price.

Deprecation dates are unchanged. `gpt-4.1-nano`, `o4-mini` and `gpt-image-1` (OpenAI) shut down this Thursday evening, October 22 (CT), and GPT-4.1, GPT-4.1 mini, GPT-4o and GPT-4o mini follow on January 14, 2027. Microsoft's Foundry now lists December 9 retirements for three older Mistral deployments on Azure. Gemini 4 Argon's launch price of $2.00 / $0.10 / $10.00 runs through November 30, then $4.00 / $0.20 / $20.00.

Anthropic, OpenAI, Google, xAI, Moonshot, Z.ai, Mistral, Meta and TypeSafe published no token price changes. Alibaba's Qwen 3.7 Max and Plus input and output prices are confirmed unchanged, though its full price page could only be partly read. IBM Granite is unchanged at $0.0636 / $0.265 but could not be fully verified (docs returned 403). Amazon's Bedrock price pages still fail to load, ByteDance still shows no usable token table, Microsoft's Foundry catalog still lists no pay-as-you-go prices, and Cohere still publishes no full token matrix.

What This Means for Customers

- If you run high-volume everyday work on MiniMax, test `MiniMax-M3.1-Flash`. At $0.15 input and $0.60 output per million tokens it costs half of MiniMax-M3's short-context rate. MiniMax has not published its maximum output length, so check limits before you switch production traffic.
- If your agents search the web through DeepSeek Harness, Claude Code or Codex, those server-side calls start billing at $0.75 per 1,000 successful Search or Fetch requests at 11:00 AM CT on October 31. DeepSeek bills only requests that return results. Track this separately from token spend before the free period ends.
- If you call `deepseek-flash`, your requests now run on DeepSeek-V4.1-Flash-1017 with no code or price change. Re-run your own quality checks, because the model behind the name changed.
- If you use Perplexity's Decisions API, `pplx-decider-flash-v1.2` halves the input price to $0.01 per million tokens. Calls to the older 27B decider names now run on v1.2.

- If you call `gpt-4.1-nano`, `o4-mini` or `gpt-image-1`, you have until Thursday evening, October 22 (CT). Google's `gemini-omni-flash-preview` and Veo 3.1 previews end the same day, Google's deep-research-pro preview ends October 23, and Perplexity retires its routes to older OpenAI models at 7:00 PM CT on October 23.
- If you call `gpt-4o`, `gpt-4o-mini`, `gpt-4.1` or `gpt-4.1-mini`, you still have until January 14, 2027. Test `gpt-6-luna` now; it lists at $0.10 input, $0.01 cached and $0.50 output per million tokens (short context).
- Claude Haiku 4.5 is still active. Anthropic lists retirement not sooner than October 15, 2026, a date that has passed, and still sets no date. Keep a tested fallback ready.

New Models and Price Changes

Prices in USD per 1M tokens.

Vendor	Model ID	Status	Input	Cached	Output
MiniMax	`MiniMax-M3.1-Flash`	New Oct 19. Open-weight; up to 1,000,000-token context. One price at all context lengths.	$0.15	$0.015	$0.60
MiniMax	`MiniMax-M3 (up to 512K input)`	Unchanged. Over 512K input: $0.60 / $0.12 / $2.40.	$0.30	$0.06	$1.20
DeepSeek	`Search API / Fetch API`	Billing for calls through DeepSeek Harness, Claude Code and Codex starts Oct 31, 11:00 AM CT. $0.75 per 1,000 successful requests each.	Per request	—	Per request
DeepSeek	`deepseek-flash`	Now served by DeepSeek-V4.1-Flash-1017. Price unchanged (off-peak shown).	$0.15	$0.003	$0.60
Perplexity	`pplx-decider-flash-v1.2`	New. Decisions API; output free.	$0.01	—	Free
Perplexity	`pplx-decider-v1.2`	Replaces the v1.1-27b and v1-27b rows at the same price; older names now select v1.2.	$0.02	—	Free
Anthropic	`claude-opus-5-5 (fast mode)`	Unchanged since Oct 16. Twice the standard rate.	$8.00	Not listed	$40.00
Meta	`muse-wonder-1.0`	Unchanged (preview).	$4.00	$0.20	$20.00
Google	`gemini-4-argon`	Unchanged. Paid tier only. Launch price through Nov 30, 2026 (thinking billed as output).	$2.00	$0.10	$10.00
Google	`gemini-4-argon (from Dec 1, 2026)`	Scheduled Standard price printed by Google.	$4.00	$0.20	$20.00
TypeSafe	`jev-1.14.0 / jev-preview`	Unchanged. jev-preview points here; output free.	$0.042	—	$0
TypeSafe	`jev-1.13.0 / jev-latest`	Unchanged. jev-latest still points here.	$0.042	—	$0
OpenAI	`gpt-4.1`	Shuts down Jan 14, 2027; replacement gpt-6-luna. Price unchanged.	$2.00	$0.50	$8.00
OpenAI	`gpt-4.1-mini`	Shuts down Jan 14, 2027; replacement gpt-6-luna. Price unchanged.	$0.40	$0.10	$1.60
OpenAI	`gpt-6-luna`	Named replacement. Unchanged (short context).	$0.10	$0.01	$0.50
IBM	`granite-4-h-small`	Unchanged. Could not fully re-verify today.	$0.0636	Not listed	$0.265

- MiniMax M3.1 Flash: listed on MiniMax's release notes on October 19, 2026 as an open-weight model for everyday work. MiniMax's docs say it supports up to a 1,000,000-token context window; maximum output is not published. MiniMax prints

a single price row with no long-context band and no cache-write price. Priority service, set with service_tier, costs 1.5 times standard.

- DeepSeek Search and Fetch: standalone APIs billed per successful request ($0.75 per 1,000 each). DeepSeek counts a request as billable only when it returns HTTP 200 and a result: Search must return a non-empty results list and Fetch must return page content. DeepSeek says calls made through DeepSeek Harness, Claude Code or Codex already use these APIs and are free until 00:00 Beijing time on November 1, 2026 (11:00 AM CT, October 31).
- DeepSeek-V4.1-Flash-1017 (October 17): DeepSeek upgraded V4.1 Flash and says the API calling method and pricing are unchanged; use deepseek-flash. The legacy names deepseek-v4-flash and deepseek-v4-flash-vision-exp are still accepted and are served by the same model at the Flash price.
- Perplexity Decisions API: pplx-decider-latest selects pplx-decider-v1.2 and pplx-decider-flash-latest selects pplx-decider-flash-v1.2; each name bills at the rate of the model it selects.
- Other changes with no price impact: Google's pricing page (last updated October 16, 2026 UTC) now says only that Gemini 4 Argon is not available on the Free tier. Meta now offers the Muse Spark Open weights for download from Meta as well as Hugging Face; there is still no Meta API price for it. Mistral lists Timestral 1.0 under its specialist models. OpenAI made prompt-to-voice generation free to create for GPT-Live on October 16; speech still bills at GPT-Live session rates.
- Amazon's Bedrock price pages could not be read today (JavaScript shell only), ByteDance published no usable token price table, Cohere still publishes no full token matrix, Microsoft's Foundry catalog lists no pay-as-you-go prices, IBM's supported-models docs returned 403, and Alibaba's price page could only be partly read. Their last confirmed prices stand.

Deprecations

Vendor	Model ID	Shutdown (CT)	Replacement	Note

OpenAI	`gpt-4.1-nano`
	`o4-mini`
	`gpt-image-1`
		Thu Oct 22, 2026, 7:00 PM CT	`gpt-5.6-luna`
			`gpt-5.6-terra`
			`gpt-image-2.5-sunburst` or `gpt-image-2.5-flare`
				Unchanged. This Thursday. OpenAI lists Oct 23 with no time; 7:00 PM CT Oct 22 is 00:00 UTC Oct 23.

Google	`gemini-omni-flash-preview`	Thu Oct 22, 2026 (time not stated)	`gemini-omni-1.1-flash`	Unchanged.

Google	`veo-3.1-generate-preview`
	`veo-3.1-fast-generate-preview`
	`veo-3.1-lite-generate-preview`
		Thu Oct 22, 2026 (time not stated)	`gemini-omni-1.1-flash`	Unchanged.

Google	`deep-research-pro-preview-12-2025`	Fri Oct 23, 2026 (time not stated)	`deep-research-preview-04-2026`	Unchanged.

Microsoft (Azure)	`Ministral-3B`
	`mistral-medium-2505`
	`mistral-small-2503`
		Wed Dec 9, 2026 (time not stated)	`ministral-ministral-4b-instruct`
			`mistral-medium-3-5`
			`mistral-small-4-119b-2603`
				New on Microsoft's Foundry retirement page. Applies to Azure deployments, not Mistral's own API.

OpenAI	`gpt-4.1 (gpt-4.1-2025-04-14)` `gpt-4.1-mini (gpt-4.1-mini-2025-04-14)`	Wed Jan 13, 2027, 6:00 PM CT	`gpt-6-luna`	Unchanged since Oct 14. OpenAI lists Jan 14, 2027 with no time; 6:00 PM CT Jan 13 is 00:00 UTC Jan 14. Each is the only listed snapshot, so the plain names stop too.

OpenAI	`gpt-4o-2024-08-06`
	`gpt-4o-2024-11-20`
	`gpt-4o-mini-2024-07-18`
		Wed Jan 13, 2027, 6:00 PM CT	`gpt-6-luna`	Unchanged since Oct 14. Same notice and timing. Fine-tuned versions follow the same schedule.

Google	`gemini-3.5-flash`	Not shutting down (Google lists N/A)	`gemini-3.6-flash (Google auto-route)`	Unchanged since Oct 12. Google routes requests automatically.

Vendor	Model ID	Shutdown (CT)	Replacement	Note
Google	`gemini-3.7-flash`	Not shutting down (Google lists N/A)	`gemini-3.8-flash (Google auto-route)`	Unchanged since Oct 12. Same wording as gemini-3.5-flash.
Google	`gemini-3.1-flash-image`	No shutdown date announced	`gemini-nano-banana-2.1`	Unchanged.

Google	`gemini-3.1-flash-tts-preview`
	`gemini-2.5-flash-preview-tts`
	`gemini-2.5-pro-preview-tts`
		Tue Nov 17, 2026 (time not stated)	`gemini-3.8-flash-tts or gemini-3.8-flash-lite-tts`	Unchanged.

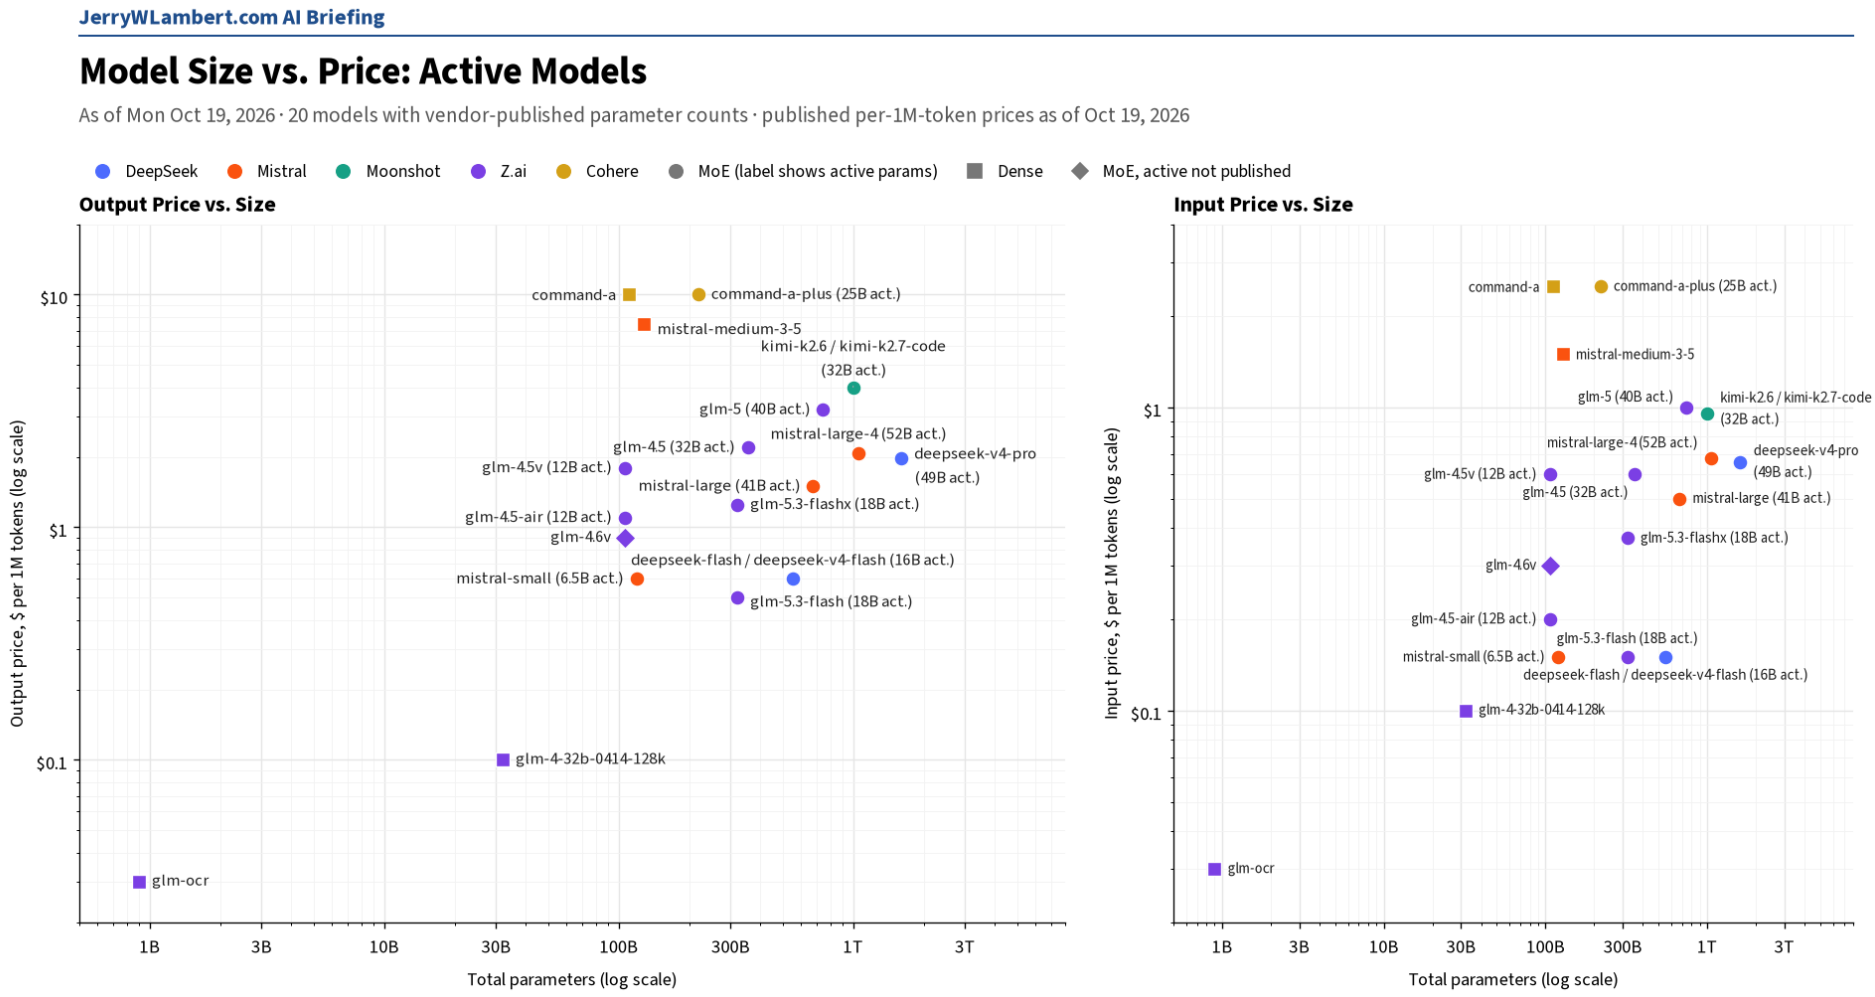

Google	`gemini-3.1-flash-live-preview` `gemini-2.5-flash-native-audio-preview-12-2025`	Tue Nov 17, 2026 (time not stated)	`gemini-3.8-live`	Unchanged.
Anthropic	`claude-sonnet-4-5-20250929`	Mon Nov 30, 2026 (time not stated)	`claude-sonnet-5-5`	Unchanged.
Anthropic	`claude-haiku-4-5-20251001`	Not sooner than Thu Oct 15, 2026; no date set	`None named`	Watch item. The earliest date has passed; still active on Anthropic's deprecations page today with no date set.

Cohere	`command-r`
	`command-r-plus`
		Deprecated Sep 15, 2025; no shutdown date set	`command-r-08-2024`
			`command-r-plus-08-2024`
			`command-a-03-2025`
				Closed to new customers; existing users keep access until retirement.

- Perplexity will retire its Agent API and Orchestrator API routes to older OpenAI models (openai/gpt-5.4, gpt-5.4-mini, gpt-5.4-nano, gpt-5.2, gpt-5.1, gpt-5 and gpt-5-mini) at 7:00 PM CT on Fri Oct 23, 2026 (00:00 UTC Oct 24). Unchanged.
- Microsoft's Foundry retirement page also lists claude-opus-5-5-fast (version 2) on Azure retiring Fri Jan 15, 2027, with no replacement named.
- OpenAI's earlier notices are unchanged: gpt-5.3-codex, gpt-5.1 and gpt-5.4-nano shut down April 1, 2027, and the /v1/audio/translations endpoint shuts down February 26, 2027, replaced by v1/realtime/translations. OpenAI removed a past gpt-4-1106-preview row from its March 26, 2026 table; nothing upcoming moved.
- Google also lists deep-research-preview-04-2026 and deep-research-max-preview-04-2026 with no shutdown date announced. Anthropic, Google and Cohere show no shutdown-date changes since Friday.
- Unverified: Google's deprecations page still shows gemini-2.5-flash-image shutting down Mon Mar 15, 2027, with gemini-3.1-flash-lite-image as the replacement, while Google's pricing page says it shut down Oct 2, 2026. Confirm with Google before you budget either date.

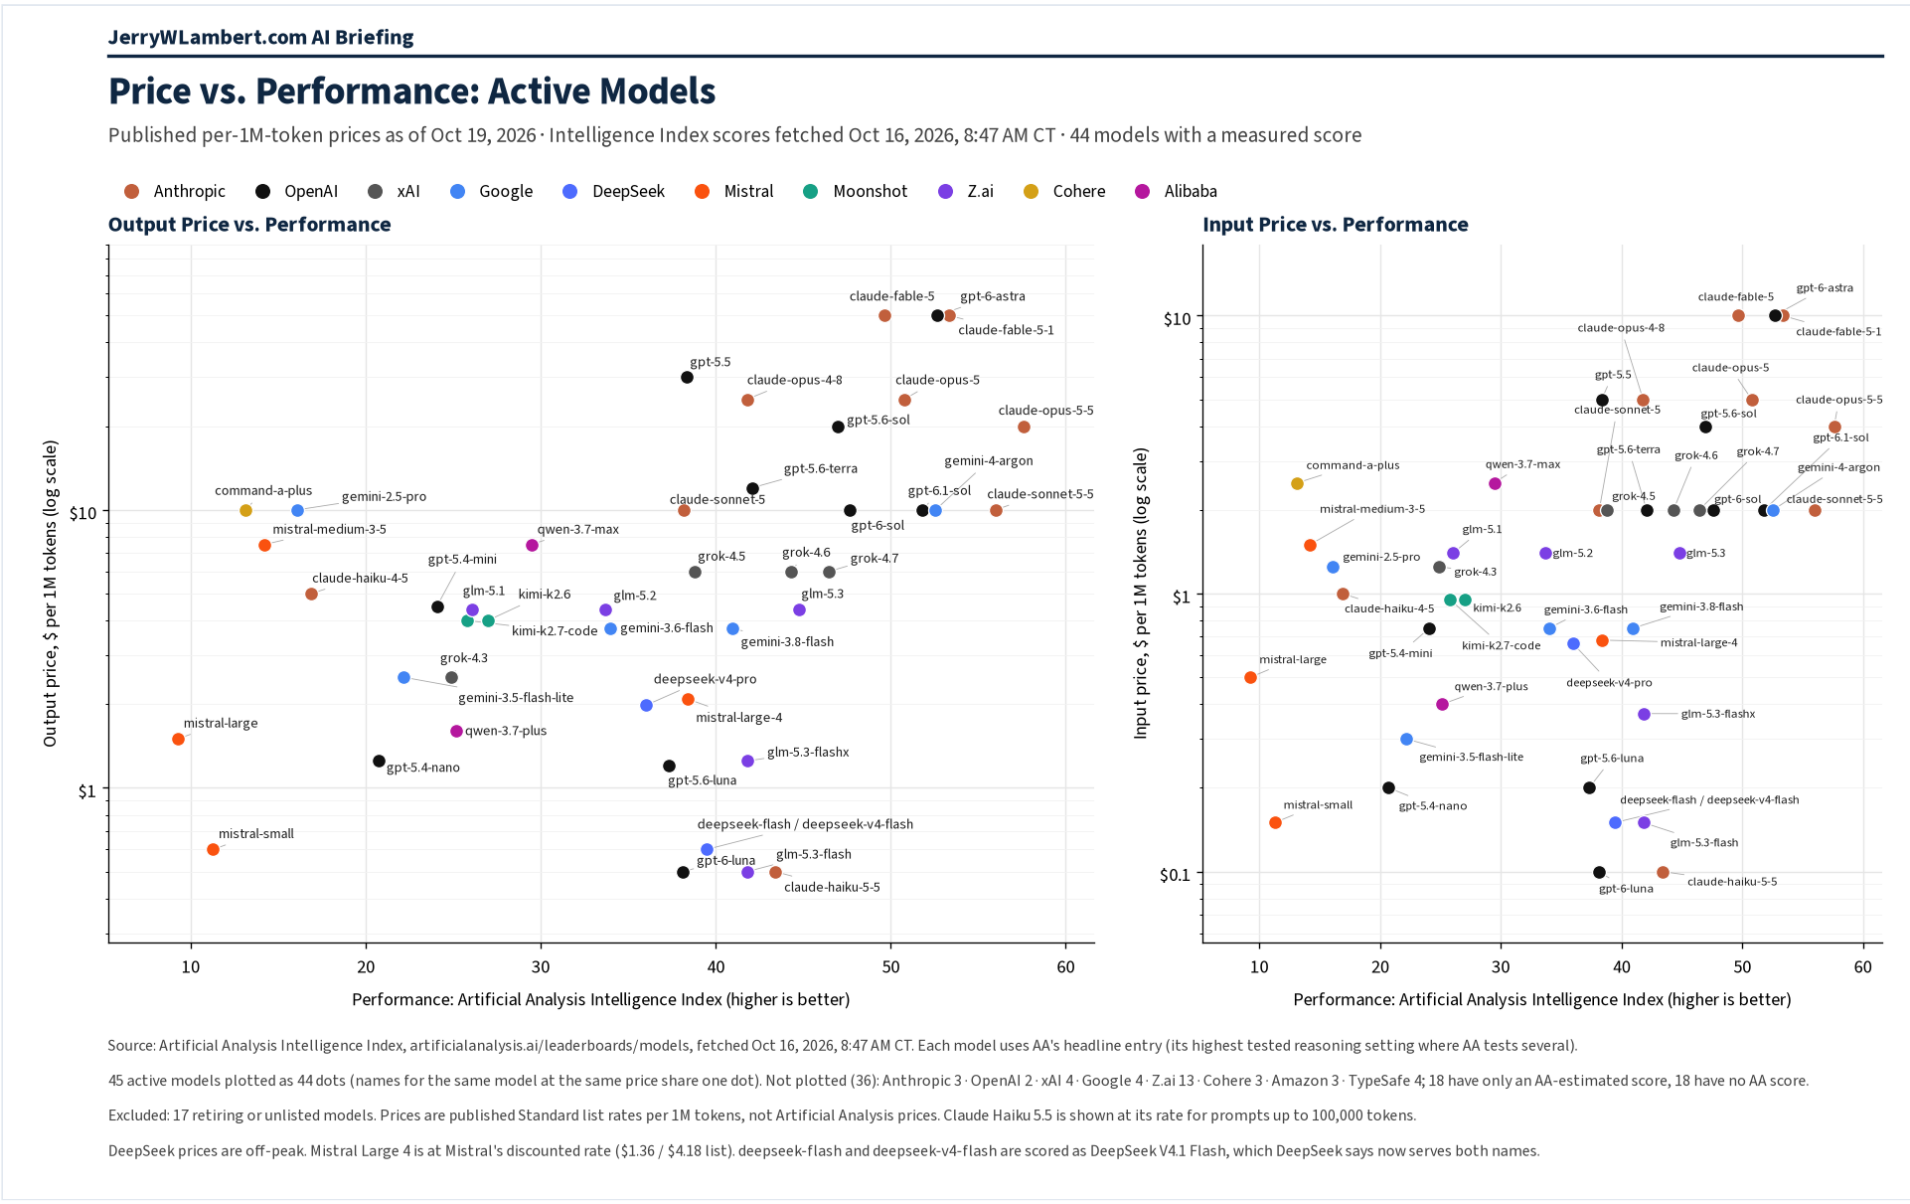

All times Central. Vendor prices, dates and model IDs are taken from first-party vendor pricing, model, deprecation and changelog pages as of 8:36 AM CT on October 19, 2026. Chart prices are as of October 19, 2026. Performance scores are from the Artificial Analysis Intelligence Index, fetched 8:47 AM CT on October 16, 2026. Items that could not be confirmed are marked unverified.
© 2026 Jerry W. Lambert Sr.

Model Size vs. Price

Across the 20 active models whose vendors publish parameter counts, price rises only loosely with total size (rank correlation 0.39 on output price). Anthropic, OpenAI, xAI and Google publish no parameter counts, so their models, including Claude Haiku 5.5, GPT-6.1 Sol and Gemini 4 Argon, are not plotted. GPT-4.1 and GPT-4.1 mini now drop out as retiring models. Prices as of October 19, 2026.

Price vs. Performance

Across the 45 active models with a measured Artificial Analysis Intelligence Index score, price rises with performance only loosely (rank correlation 0.45 on output price). Google's Gemini 4 Argon joins the chart at 52.6 for $10 per million output tokens. Claude Haiku 5.5 leads at $0.50 or less (43.4); GPT-6.1 Sol scores 51.8 at $10. Scores as fetched October 16, 2026, 8:47 AM CT; prices as of October 19, 2026.
