Summary

AI Transformation executive with 30+ years leading enterprise modernization across telecommunications, hyperscale infrastructure, SaaS, and data-intensive industries. AI is compressing the technology workforce and redefining what leadership looks like -- the next generation of technology executives must be hands-on with the tools daily, not managing from a distance. I bring full-stack technical depth, intimate daily involvement with LLMs and AI frameworks, and the executive judgment to manage the hardest parts of transformation: staffing reductions, tool selection, token budgets, delivery pace, HR navigation, and board-level governance.

Architect of AI-driven operating models integrating LLMs (ChatGPT, Claude, Crew.AI, Grok) and computer vision frameworks (YOLO) into production systems, QA automation, and enterprise workflows. Proven track record transforming legacy architectures into scalable, AI-enabled cloud ecosystems across AWS and Azure -- aligning modernization strategy with NIST, GDPR, and enterprise risk frameworks. Secured board approval for GPU-powered AI platforms leveraging NVIDIA libraries and optical subsystems to automate high-value component classification at hyperscale volumes (18,000+ servers weekly).

Former COO/CIO with deep experience in ERP consolidation, billing platform unification, cybersecurity modernization, and multi-region infrastructure transformation. Delivered 70%+ software cost reductions, six-platform consolidations, 99.999% uptime cloud systems, and rapid international deployments. Proven ability to lead through the human side of transformation -- PE-driven restructurings, 75% staff reductions with operational continuity, M&A integrations, and organizational change at scale. Combines executive leadership, private equity partnership, and hands-on technical capability to drive AI transformation that aligns technology innovation with business strategy and financial performance.

Selected AI Systems Built (Hands-On)

Live, in-production systems I personally architected and operate -- not demos or proofs of concept. They process real data, manage real money, and route real API traffic every day.

AI Model Router and Advisory Platform

Centralized multi-provider routing API cataloging 77 models across 16 vendors (Anthropic, OpenAI, Google, xAI, Meta, DeepSeek, Mistral, Perplexity, Cohere, Amazon, Alibaba). Routes each request by least-cost scoring on cost, quality, and reliability; tracks per-model spend; enforces budget caps; and auto-selects the cheapest capable model for each task. Python, FastAPI, REST.

AI Proxy -- Async LLM Gateway

SQS-based asynchronous gateway on AWS that brokers AI prompts from any client through the router and returns results. Centralizes authentication, per-provider rate limits, usage policy, retry logic, dead-letter queues, FIFO ordering, and full audit logging so no individual service touches a provider API directly. Python, AWS SQS, EC2, systemd.

Autonomous Trading System

End-to-end platform managing a live brokerage account through 10+ strategy plugins. A 4-agent LLM swarm (technical, fundamental, sentiment, macro) analyzes 80 tickers nightly and feeds a conviction-weighted portfolio engine, with all state in PostgreSQL and TimescaleDB and a real-time dashboard. Python, Alpaca API, LLM agents, FastAPI.

SIPSwarm -- AI-Native Session Border Controller

Replaces active/standby SBC pairs with a swarm mesh of identical, expendable nodes, each running 10 LLM agents for configuration, routing, security, and fraud detection. A bid/ask pricing engine modeled on exchange mechanics negotiates

rates per session across AI, voice/video, and SMS; hash-chained CDRs with Merkle-tree verification provide financial-grade audit trails. Rust, Python, SIP/RTP, NATS JetStream, Docker, Terraform.

Work Experience

Managing Director, SmarterDev AI, Dallas, Tx

03/2025 - Present

- Executive CXO Consultancy
- Spearheaded executive engagements focused on AI-driven modernization, enterprise refactoring, and cloud transformation for telecommunications and hyperscaler infrastructure organizations.
- Engineered and delivered comprehensive modernization roadmaps integrating LLMs (ChatGPT, Claude, Crew.AI, Grok) and computer vision frameworks (YOLO) into enterprise workflows, QA pipelines, and data operations.
- Utilized hands-on development and implementation experience with ChatGPT, Claude, Crew.AI, YOLO, ClawBot and Grok for code generation, documentation automation, system integration, and AI-assisted software development.
- Formulated AI ROI frameworks and governance models aligned with NIST, GDPR, and standards.
- Authored and presented the AI Modernization & Enterprise Transformation thought-leadership series and executive presentation portfolio.
- Advised C-level teams on strategies for evolving from automation to autonomy with measurable ROI and operational accountability.
- Partnered with technology leaders to transform legacy systems into scalable, AI-enabled architectures across multi-region AWS and Azure environments.

Vice President of IT, Remarkets, Austin, Tx

05/2024 - 02/2025

- Directed operations in the IT Asset Disposition (ITAD) industry serving the largest hyperscalers in the world.
- Facilitated short-term executive deployment for Brightstar Capital Partners board members.
- Implemented comprehensive CRM, sales tracking, analytics, and workflow systems to unify operational visibility.
- Oversaw complete website rebranding and relaunch under a new corporate identity.
- Assumed technical leadership in direct customer communications with major enterprise and hyperscaler clients.
- Executed pre-planned staffing reductions while maintaining delivery continuity and service quality.
- Achieved a reduction in software licensing costs by over 70% through platform consolidation and vendor renegotiation.
- Directed data systems supporting decomposition, inventory, and parts disposition for over 18,000 decommissioned servers weekly.
- Secured board approval and technical buy-in for an AI-based parts separation, tracking, inventory, and disposition platform utilizing NVIDIA GPU libraries, optical subsystems, and the associated AI/vision ecosystem to automate classification and routing of high-value components.
- Implemented information systems for new Ireland operations in under 30 days.
- Deployed management and operations dashboards delivering real-time KPI visibility across all facilities.

Senior Director - Development & Data Management, Brightstar Capital Partners - Americas Auto Group, Carmel

04/2023 - 05/2024

- Served as executive owner of all software development and data management across 39 locations for the 2nd largest wholesale auto auction company in the US (\$7B annual sales).
- Conducted short-term executive deployment for Brightstar Capital Partners board members.
- Consolidated all board-level reporting into a single weekly report.
- Centralized all reporting into common operations.
- Executed AWS migration, consolidating data operations across all auction facilities.
- Implemented LLMs in development and QA workflows, enhancing speed and documentation accuracy.
- Achieved a 50% reduction in AR through improved analytics and reconciliation automation.
- Designed third-party integration architecture utilizing AWS publish/subscribe micro-services.

Chief Technology Officer, Syntegra LLC, Dallas

07/2022 - 04/2023

- Owned technology for a telecom SaaS business.
- Consolidated five acquired companies onto a single platform and operating model, delivering \$300K in savings.
- Established architecture standards and delivery governance across the combined organization.

Senior Vice President (Reporting to CFO), Pareteum Corp, Irving

10/2019 - 07/2022

- Facilitated technical aspects of M&A activity through sale to Circles Life.
- Served as executive lead for global billing operations and cybersecurity.
- Consolidated six global billing platforms and deployed Oracle ERP Web.
- Selected and implemented CrowdStrike MDR for over 1,500 servers, providing asset visibility and vulnerability identification across the laptop fleet and server network.
- Oversaw GDPR/CCPA compliance and managed Data Protection Officer activities.
- Managed the telecom SaaS platform provider (MVNO, IoT, WiFi).
- Directed infrastructure, development, QA, and cybersecurity across the US, Europe, and India.
- Consolidated operations of sister companies into a unified AWS architecture.
- Drove ERP and billing platform unification, reducing licensing costs by \$300K annually.
- Administered the NIST framework for cybersecurity compliance during the transition.

Chief Operating Officer, Karma Mobility, Irving, Tx

07/2017 - 03/2019

- Facilitated technical aspects of M&A activity through sale of Karma to Red Pocket.
- Managed data operations for a nationwide hotspot customer base.
- Delivered the 'Karma Black' VPN-based WiFi hotspot product while reducing staffing costs.
- Developed an IoT roadmap with LoRaWAN as the primary design and integrated an online billing platform.

Chief Operating Officer, Verify Systems, Inc., Dallas

08/2003 - 03/2017

- Architected a multi-billion-transaction cloud platform with 99.999% uptime.
- Migrated queuing from RabbitMQ to AWS Kinesis Firehose and Lambda.
- Provided back-office services to US-based telecommunications SaaS service providers.
- Implemented offshore development and customer support operations in India and South America.
- Built a SIP-based wholesale telecom startup to \$5M monthly revenue within two years.
- Developed and deployed real-time traffic monitoring and billing systems.
- Negotiated contracts with AT&T, British Telecom, Sprint, Tata, Deutsche Telekom, Telecom Italia, China Telecom, Chungwa Telecom, Bezeq, Telmex, and Bell Canada.
- Awarded two U.S. patents for data transformation and targeting.

Chief Information Officer, CCC Globalcom, Houston

08/2002 - 08/2003

- Facilitated sale of Local Exchange customer-base.
- Facilitated the purchase of calling card customers in Florida.
- Directed operational downsizing initiatives for Board oversight during the company sale period.
- Decreased technical staff by 75%, ensuring continuous data operation integrity.
- Developed customer-based data asset packages and support systems to boost the sale price and facilitate a smooth transition.

Vice President of Application Engineering, Vocaltec Communications, Fort Lee, New Jersey

07/1998 - 12/1999

- Managed nationwide executive customer communications pertaining to product necessities and possibilities. Headed sales engineering and was the direct link to the development division. Was the company's primary expert on the largest initiative in its history (Bell Atlantic \$25M) and finalized the premier technology alliance (Cisco). Supervised the RFP response team for all key national accounts. Received Employee of the Year honors in 1998.

Senior Executive Consultant, Digital Equipment Corporation, Dallas, Tx

05/1997 - 08/1998

- Provided C-level consulting services to major communications clients nationwide, including AT&T, MCI, and Metromedia.
- Served as the primary resource on MCI's Callcenter 2000 project, defining a 10-year call center strategy for MCI.
- Represented Digital Equipment at prominent product trade shows.

Senior Manager, Product Technology, Excel Communications, Dallas, Tx

12/1995 - 05/1997

- Led the definition and development of technology products catering to 4 million customers and 400,000 independent representatives; the company achieved the fastest time to \$1 billion in revenue and initial public offering on the NYSE.
- Enabled a 19% monthly growth rate during peak periods of expansion.
- Successfully launched a nationwide paging product within 6 months, encompassing all customer locations.
- Achieved a 75% reduction in customer onboarding duration.
- Acted as a representative for the technology teams in working groups dedicated to the management of storage, server systems, and monitoring solutions organization-wide.

Education

Bachelor of Business Administration (B.B.A.), Business Information Systems, Stephen F. Austin State University, Nacogdoches, Tx

GPA: 3.8

08/1984 - 05/1988

U.S. Patents Awarded

- Text Normalization, 20100257172
- Data Targeting, 20100257144
