Daily Model Brief, October 28, 2026

No token price I could confirm changed since Tuesday, and no new model launched. On Saturday, DeepSeek starts billing Search and Fetch calls and Moonshot closes K2 models to new accounts. Moonshot also reworked how it bills web search.

Wednesday, October 28, 2026 · Prices as of 8:45 AM CT · Covers Tuesday, October 27 through this morning

Executive Summary

No token price changed since Tuesday's brief on any model I track at Anthropic, OpenAI, Google, xAI (Grok), DeepSeek (yuan prices), Moonshot, Z.ai, MiniMax, Mistral, Alibaba, Cohere, Meta, TypeSafe, Xiaomi, StepFun or Perplexity. None of them launched a new model overnight.

GPT-6.1 Terra's price held on its second day. I re-checked it this morning: `gpt-6.1-terra` still costs $1.00 input, $0.05 cached and $5.00 output per million tokens, half of GPT-6.1 Sol ($2.00 / $0.10 / $10.00).

Both Saturday deadlines are three days out and unchanged this morning. At 11:00 AM CT on Saturday, October 31, DeepSeek starts billing Search and Fetch calls made through DeepSeek Harness, Claude Code and Codex. The same day, Moonshot stops letting newly registered accounts use its K2 models, and it still gives no exact retirement date beyond the end of December.

Moonshot reworked how it bills web search. It now lists two more ways to be billed per search: the web search tool in its Responses API, and the built-in web search tool for Kimi K3. The per-call prices did not display today, so I could not confirm them.

On Tuesday, xAI added custom moderation controls to its text API, and Google released a command-line tool for the Gemini API in beta. Neither changes a price.

Not confirmed today: Amazon and ByteDance prices, Tencent prices (last confirmed Tuesday afternoon), DeepSeek's dollar prices, IBM's model list, and Microsoft, which lists no pay-as-you-go prices. Their last confirmed prices stand. Performance scores in the chart are still as of October 16, because this morning's fresh pull was again incomplete.

What This Means for Customers

- If your agents search the web through DeepSeek Harness, Claude Code or Codex, DeepSeek starts billing those Search and Fetch calls at 11:00 AM CT this Saturday, October 31, at $0.75 per 1,000 successful requests each (last confirmed dollar price). Set a budget line for it now, separate from token spend.
- If you run `kimi-k2.6` or `kimi-k2.7-code`, plan the move off K2 before the end of December. Any Moonshot account registered from October 31 will not be able to use K2; existing accounts keep access until retirement.
- If you use Moonshot's web search through its Responses API or with Kimi K3, each search the server runs is a separate charge on top of token costs. Failed searches, searches the model does not trigger and empty results are not billed. Check the per-call price on your bill, because Moonshot did not display it today.
- If you use `gpt-6.1-sol`, test `gpt-6.1-terra` on the same work: every token price is half. Check output quality first, and check prompt sizes, because a request over 272,000 input tokens bills entirely at the higher long-context rate.
- If you still run `gpt-4.1` or `gpt-4.1-mini`, shutdown is January 14, 2027, and the replacement is `gpt-6-luna`.
- Claude Haiku 4.5 is still active. Anthropic lists its retirement as not sooner than October 15, 2026, a date that has passed, and still sets no date. Keep a tested fallback ready.

New Models and Price Changes

Prices in USD per 1M tokens.

Vendor	Model ID	Status	Input	Cached	Output
OpenAI	`gpt-6.1-terra`	Unchanged (launched Mon Oct 26). Context window: 1,050,000 tokens. Cache writes: $1.25 (30-minute) or $2.50 (12-hour). Prompts over 272K input tokens: 2x input and cache, 1.5x output, for the whole request.	$1.00	$0.05	$5.00
OpenAI	`gpt-6.1-sol`	Unchanged. Terra costs half on every line.	$2.00	$0.10	$10.00
OpenAI	`gpt-5.6-terra`	Unchanged. Older model; not the same as gpt-6.1-terra.	$2.00	$0.20	$12.00
Moonshot	`Web search (Responses API and Kimi K3 built-in tool)`	Billing terms rewritten since Tuesday. Billed per search the server runs, plus model tokens. Per-call prices did not display today; not confirmed.	Per call	Not applicable	Per call
Moonshot	`kimi-k3.1-pro`	Unchanged. Cache writes: $2.00 (5-minute) or $4.00 (1-hour).	$2.00	$0.20	$10.00
Moonshot	`kimi-k3.1-pro-highspeed`	Unchanged. Cache writes: $4.00 (5-minute) or $8.00 (1-hour).	$4.00	$0.20	$20.00
Moonshot	`kimi-k3`	Unchanged.	$3.00	$0.30	$15.00
Moonshot	`kimi-k2.7-code`	Unchanged. Closed to new accounts from Oct 31; retiring by end of December.	$0.95	$0.19	$4.00
Moonshot	`kimi-k2.6`	Unchanged. Closed to new accounts from Oct 31; retiring by end of December.	$0.95	$0.16	$4.00
Google	`gemini-3.8-flash (also serves gemini-3.7-flash)`	Unchanged through Dec 31; $1.50 / $0.15 / $7.50 from Jan 1, 2027.	$0.75	$0.075	$3.75
Alibaba	`qwen3.8-27b`	Unchanged (International).	$0.50	Not listed	$3.00
Alibaba	`qwen3.8-max`	Unchanged.	$2.00	Not listed	$6.00
MiniMax	`MiniMax-M3.1-Flash`	Unchanged.	$0.15	$0.015	$0.60
Mistral	`mistral-large-4`	Unchanged at list price.	$1.36	$0.14	$4.18
Meta	`muse-spark-1.3`	Unchanged (Standard mode).	$1.25	$0.15	$4.25
Cohere	`Command R+ 08-2024 (legacy)`	Unchanged. No cached-token price published.	$2.50	Not listed	$10.00
DeepSeek	`deepseek-v4-pro`	Off-peak price, last confirmed. Yuan prices unchanged today; dollar prices not confirmed today.	$0.66	$0.022	$1.98
DeepSeek	`Search API / Fetch API`	Billing for calls through DeepSeek Harness, Claude Code and Codex starts Sat Oct 31, 11:00 AM CT, at $0.75 per 1,000 successful requests each (last confirmed dollar price).	Per request	Not applicable	Per request
Tencent	`Hy3`	Last confirmed Tuesday afternoon (Oct 27). Not confirmed today.	$0.132	$0.033	$0.528
TypeSafe	`jev-1.14.0`	Unchanged. jev-latest points here. Output free.	$0.042	Not listed	Free

Vendor	Model ID	Status	Input	Cached	Output
IBM	`granite-4-h-small`	Last confirmed price. Not confirmed today.	$0.0636	Not listed	$0.265

- No public token price changed since Tuesday's brief at any vendor I could confirm, and no new model launched.
- Terra's long-context rule applies to the whole request: a 300,000-token prompt bills every input token at $2.00 per million, not just the tokens past 272,000.
- Moonshot's rewritten terms say model input and output tokens are still billed at the model's own price when a search runs, and it drops the older built-in search section. The per-search prices I last confirmed could not be re-confirmed today.
- Prices from Amazon, ByteDance and Tencent could not be confirmed today, IBM's model list could not be confirmed, and Microsoft lists no pay-as-you-go prices. Their last confirmed prices stand, unverified today.

Deprecations

Vendor	Model ID	Shutdown (CT)	Replacement	Note
Google	`gemini-3.7-flash`	No shutdown	`gemini-3.8-flash`	Google routes API requests to gemini-3.8-flash automatically, at the same price.

Moonshot	`kimi-k2.6`
	`kimi-k2.7-code`
	`(all K2 models)`
		By end of December 2026 (no exact date)	`kimi-k3.1-pro`	Unchanged. Closed to newly registered accounts from Sat Oct 31; existing accounts keep access until retirement.

Google	`gemini-3.1-flash-tts-preview`
	`gemini-2.5-flash-preview-tts`
	`gemini-2.5-pro-preview-tts`
		Tue Nov 17, 2026 (time not stated)	`gemini-3.8-flash-tts` or `gemini-3.8-flash-lite-tts`	Unchanged.

Google	`gemini-3.1-flash-live-preview` `gemini-2.5-flash-native-audio-preview-12-2025`	Tue Nov 17, 2026 (time not stated)	`gemini-3.8-live`	Unchanged.
Microsoft (Azure)	`Llama-4-Maverick-17B-128E-Instruct-FP8`	Thu Nov 19, 2026 (time not stated)	`None named`	Unchanged.
Anthropic	`claude-sonnet-4-5-20250929`	Mon Nov 30, 2026 (time not stated)	`claude-sonnet-5-5`	Unchanged.
Microsoft (Azure)	`Ministral-3B` `mistral-medium-2505`	Wed Dec 9, 2026 (time not stated)	`ministral-ministral-4b-instruct` `mistral-medium-3-5`	Unchanged. Applies to Azure deployments, not Mistral's own API.

OpenAI	`gpt-5`
	`gpt-5-mini`
	`gpt-5-nano`
	`gpt-5-pro`
	`o3`
	`o3-pro (dated snapshots)`
		Fri Dec 11, 2026 (time not stated)	`gpt-5.6-sol`
			`gpt-5.6-terra`
			`gpt-5.6-luna`
				Not a new notice (announced June 11, 2026); added to this table today for completeness. gpt-5 and o3 move to gpt-5.6-sol, gpt-5-mini to gpt-5.6-terra, gpt-5-nano to gpt-5.6-luna, and gpt-5-pro and o3-pro to gpt-5.6-sol in pro reasoning mode.

OpenAI	`gpt-4.1`
	`gpt-4.1-mini`
	`gpt-4o-2024-08-06`
	`gpt-4o-2024-11-20`
	`gpt-4o-mini-2024-07-18`
		Wed Jan 13, 2027, 6:00 PM CT	`gpt-6-luna`	Unchanged. OpenAI lists Jan 14, 2027 with no time; 6:00 PM CT Jan 13 is 00:00 UTC Jan 14.

Microsoft (Azure)	`Llama-3.3-70B-Instruct`	Sun Jan 31, 2027 (time not stated)	`None named`	Unchanged.

Vendor	Model ID	Shutdown (CT)	Replacement	Note
Microsoft (Azure)	`cohere-command-a` `mistral-small-2503`	Mon Feb 15, 2027 (time not stated)	`Cohere-command-a-plus-05-2026` `mistralai-mistral-small-4-119b-2603`	Unchanged.
OpenAI	`gpt-5.4-nano` `gpt-5.4-nano-2026-03-17`	Thu Apr 1, 2027 (time not stated)	`gpt-6-luna`	Unchanged. Also retiring that day: gpt-5.3-codex and gpt-5.1, with gpt-6-sol as their replacement.
Microsoft (Azure)	`Kimi-K2.6` `Kimi-K2.7-Code`	Fri Apr 16, 2027 (time not stated)	`None named`	Unchanged. Azure's date is later than Moonshot's own K2 retirement.
Microsoft (Azure)	`embed-v-4-0`	Tue Jun 1, 2027 (time not stated)	`Cohere-embed-v5-fast`, `Cohere-embed-v5-pro`	Unchanged.
Microsoft (Azure)	`Cohere-rerank-v4.0-fast` `Cohere-rerank-v4.0-pro`	Mon Sep 13, 2027 (time not stated)	`Cohere-rerank-v5-fast` `Cohere-rerank-v5-pro`	Unchanged.
Microsoft (Azure)	`gpt-oss-120b`	Wed Sep 15, 2027 (time not stated)	`None named`	Unchanged.
Microsoft (Azure)	`DeepSeek-V3.2` `DeepSeek-V3.2-Speciale`	Mon Nov 1, 2027 (time not stated)	`DeepSeek-V4.1-Flash` `DeepSeek-V4-Pro`	Unchanged.
Anthropic	`claude-haiku-4-5-20251001`	Not sooner than Thu Oct 15, 2026; no date set	`None named`	Watch item. Still active with no date set.

Cohere	`command-r`
	`command-r-plus`
		Deprecated Sep 15, 2025; no shutdown date set	`command-r-08-2024`
			`command-r-plus-08-2024`
			`command-a-03-2025`
				Closed to new customers; existing users keep access until retirement.

- No new retirement and no moved shutdown date since Tuesday's brief at any vendor I track.
- OpenAI's transcription notice is unchanged: whisper-1, gpt-4o-transcribe, gpt-4o-mini-transcribe, gpt-4o-transcribe-diarize and the /v1/audio/translations endpoint shut down February 26, 2027.
- Moonshot still gives a month, not a day, for the K2 retirement, so treat December 1 as the safe planning date.

Price Tracker

Shares of the full tracked population.

- Tracked models: 1,934 (count as of October 25).
- Audited pricing, confirmed against the vendor's own published prices: 13.1% of the full tracked population.
- Unaudited pricing: 5.3%.
- The rest have no public per-token price (47.6%: self-hosted open weights, retired or unpublished) or are duplicate listings of another tracked model (34.0%).

Agent Platforms

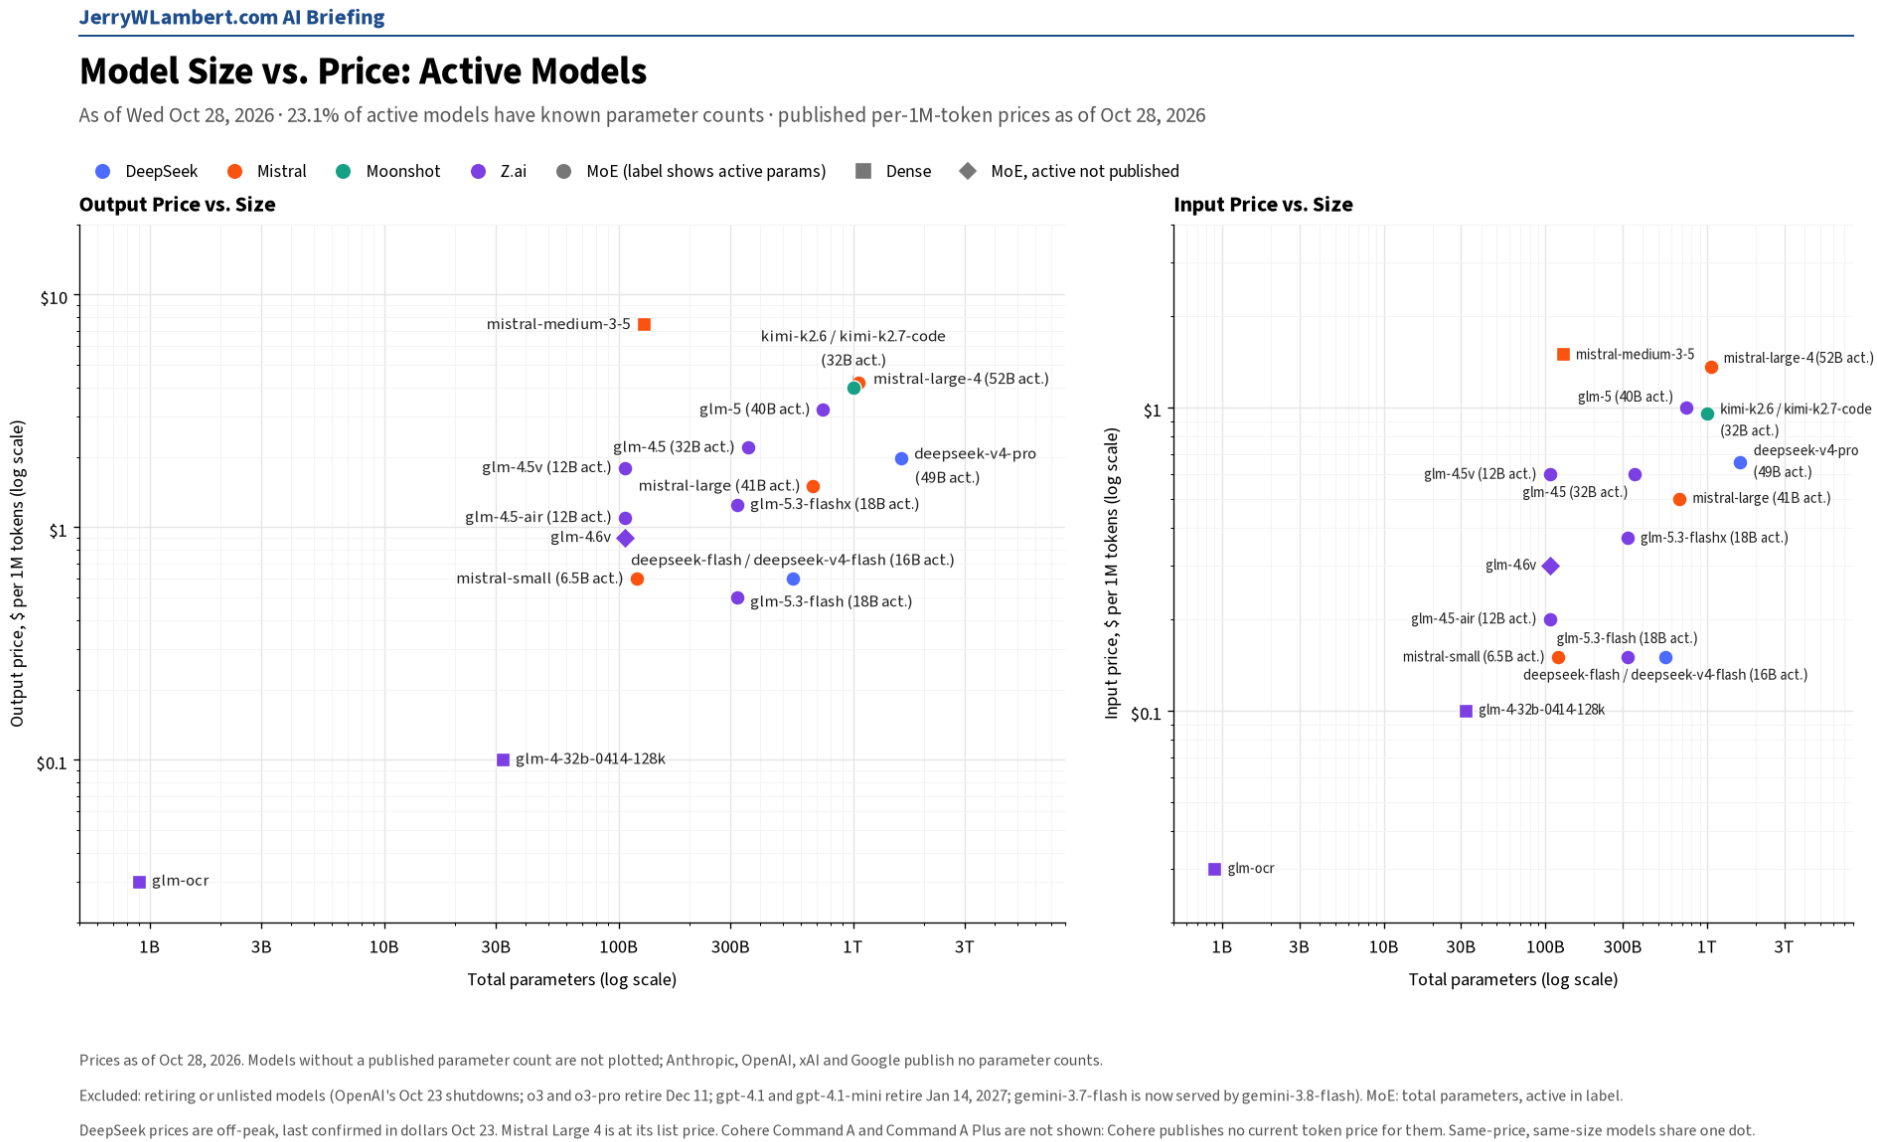

Hosted AI agents that come with their own persistent cloud computer.

- **Grok Bot (xAI)**: its own persistent cloud computer. On the X Subscription it is included on Premium, Super and Ultra, draws from the same weekly usage pool as Cursor and the Grok apps, and prepaid credit covers usage past the pool. New since Tuesday morning: release v0.77.0 (dated October 26) adds a Permissions section in Settings, a Payments tab in the Vault (you still approve every purchase) and one-at-a-time 1Password logins you approve, and inviting a friend can now earn a usage reset. No plan price change.
- **dots (OpenAI)**: not verified today. Last confirmed: a dot "has its own cloud computer," and the first comes with Pro and Business Premium at no extra cost.
- **Muse (Meta)**: "You and your Muse share your own dedicated computer in the cloud." Runs on Muse Spark 1.3, whose API price is unchanged at $1.25 input, $0.15 cached and $4.25 output per million tokens. Billing is unverified today.

- **Manus**: the Cloud Computer add-on is a persistent server billed separately at $30 a month (2 vCPUs, 4 GB RAM, 70 GB storage) or $50 a month (2 vCPUs, 8 GB RAM, 120 GB storage). No change.
- **Genspark Claw**: runs "on a dedicated cloud computer provisioned just for you," which requires a Lite, Standard or Powerful Cloud Computer subscription; Genspark publishes no dollar amounts. No price change.

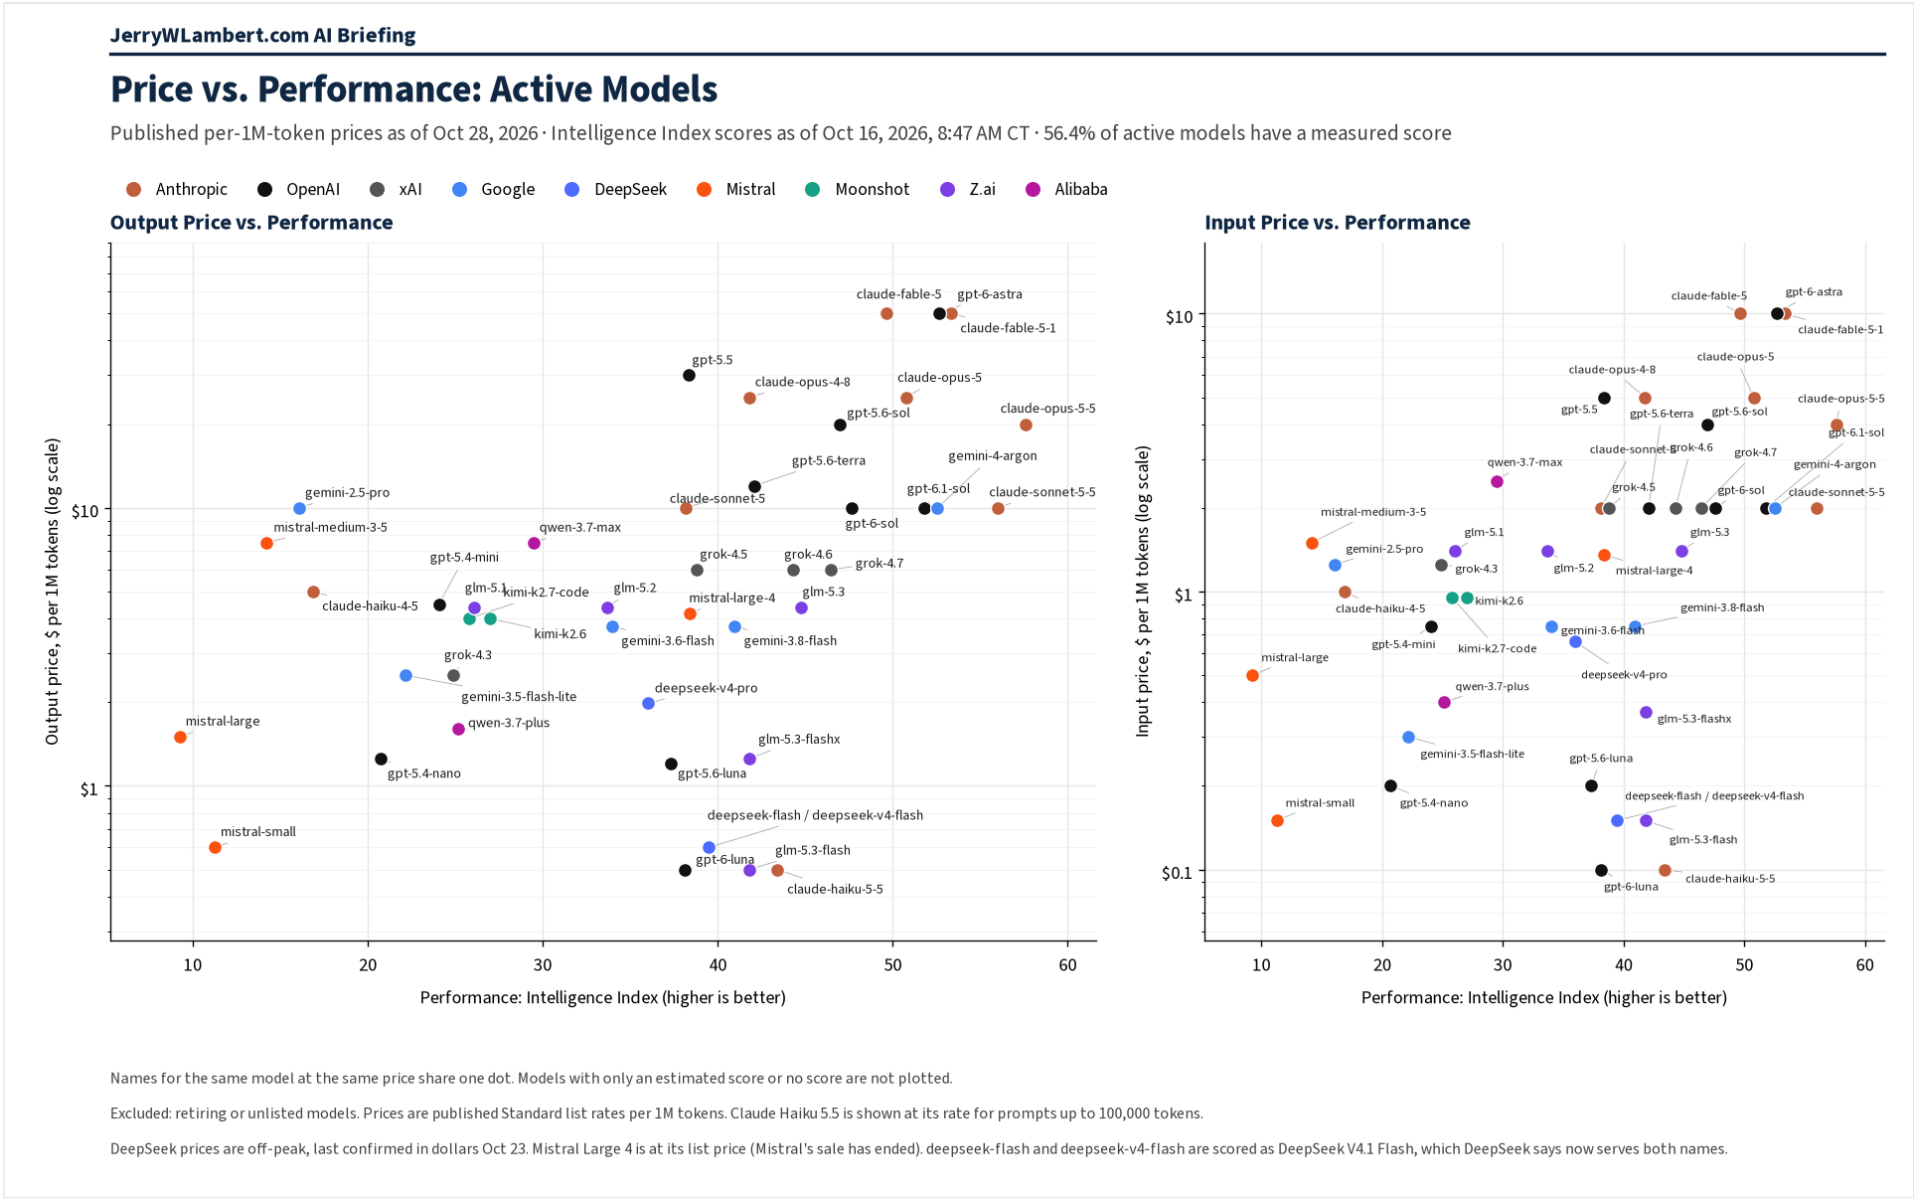

All times Central. Vendor prices, dates and model IDs are as of 8:45 AM CT on October 28, 2026. Chart prices are as of October 28, 2026. Performance scores are as of October 16, 2026 and have not been refreshed since. Price Tracker percentages are shares of the full tracked population; chart percentages are shares of active models. Items that could not be confirmed are marked unverified.
© 2026 Jerry W. Lambert Sr.

Model Size vs. Price

Among active models with a known parameter count (23.1% of active models), price rises with total size (rank correlation 0.62 on output price). Anthropic, OpenAI, xAI and Google publish no parameter counts, so their models are not plotted. No plotted price changed since Tuesday. Prices as of October 28, 2026.

Price vs. Performance

Among active models with a performance score (56.4% of active models), price rises with performance only loosely (rank correlation 0.49 on output price). Claude Haiku 5.5 leads at $0.50 or less (43.4). At the frontier, Gemini 4 Argon scores 52.6 and GPT-6.1 Sol 51.8, each at $10 output, while xAI's Grok 4.7 scores 46.5 at $6. Scores as of October 16, 2026 (not refreshed since); prices as of October 28, 2026.
