SUMMARY

AI Transformation executive with 30+ years of experience leading enterprise modernization across telecommunications, hyperscale infrastructure, SaaS, and data-intensive industries. Architect of AI-driven operating models that integrate LLMs (ChatGPT, Claude, Crew.AI, Grok) and computer vision frameworks (YOLO) into production systems, QA automation, enterprise workflows, and large-scale data operations. Trusted advisor to boards and C-level leaders on evolving from traditional automation to AI-enabled autonomy with measurable ROI, governance discipline, and operational accountability.

Proven track record transforming legacy architectures into scalable, AI-enabled cloud ecosystems across AWS and Azure—aligning modernization strategy with NIST, GDPR, and enterprise risk frameworks. Secured executive and board approval for GPU-powered AI platforms leveraging NVIDIA libraries and optical subsystems to automate high-value component classification and routing at hyperscale volumes (18,000+ servers weekly). Designed AI integration roadmaps that accelerate development velocity, improve documentation accuracy, reduce operating costs, and enhance decision intelligence.

Former COO/CIO and global technology leader with deep experience in ERP consolidation, billing platform unification, cybersecurity modernization, and multi-region infrastructure transformation. Delivered 70%+ software cost reductions, six-platform consolidations, 99.999% uptime cloud systems, and rapid international deployments. Combines executive leadership, private equity partnership, and hands-on technical depth to drive enterprise-wide AI transformation that aligns technology innovation with business strategy and financial performance.

PROFESSIONAL EXPERIENCE

Managing Director

SmarterDev.ai — Denton, TX

03/2025 – Present

Executive CXO Consultancy

- Spearheaded executive engagements focused on AI-driven modernization, enterprise refactoring, and cloud transformation for telecommunications and hyperscaler infrastructure organizations.
- Engineered and delivered comprehensive modernization roadmaps integrating LLMs (ChatGPT, Claude, Crew.AI, Grok) and computer vision frameworks (YOLO) into enterprise workflows, QA pipelines, and data operations.
- Utilized hands-on development and implementation experience with ChatGPT, Claude, Crew.AI, YOLO, ClawBot and Grok for code generation, documentation automation, system integration, and AI-assisted software development.
- Formulated AI ROI frameworks and governance models aligned with NIST, GDPR, and standards.
- Authored and presented the AI Modernization & Enterprise Transformation thought-leadership series and executive presentation portfolio.
- Advised C-level teams on strategies for evolving from automation to autonomy with measurable ROI and operational accountability.
- Partnered with technology leaders to transform legacy systems into scalable, AI-enabled architectures across multi-region AWS and Azure environments.

Vice President of IT

Brightstar Capital Partners — Remarkets, Inc. — Austin, TX

05/2024 – 02/2025

- Directed operations in the IT Asset Disposition (ITAD) industry serving the largest hyperscalers in the world.
- Facilitated short-term executive deployment for Brightstar Capital Partners board members.
- Implemented comprehensive CRM, sales tracking, analytics, and workflow systems to unify operational visibility.
- Oversaw complete website rebranding and relaunch under a new corporate identity.
- Assumed technical leadership in direct customer communications with major enterprise and hyperscaler clients.
- Executed pre-planned staffing reductions while maintaining delivery continuity and service quality.
- Achieved a reduction in software licensing costs by over 70% through platform consolidation and vendor renegotiation.
- Directed data systems supporting decomposition, inventory, and parts disposition for over 18,000 decommissioned servers weekly.
- Secured board approval and technical buy-in for an AI-based parts separation, tracking, inventory, and disposition platform utilizing NVIDIA GPU libraries, optical subsystems, and the associated AI/vision ecosystem to automate classification and routing of high-value components.
- Implemented information systems for new Ireland operations in under 30 days.
- Deployed management and operations dashboards delivering real-time KPI visibility across all facilities.

Senior Director — Development & Data Management

Brightstar Capital Partners — Americas Auto Group — Carmel, IN

04/2023 – 05/2024

- Served as executive owner of all software development and data management across 39 locations for the 2nd largest wholesale auto auction company in the US (\$7B annual sales).
- Conducted short-term executive deployment for Brightstar Capital Partners board members.
- Consolidated all board-level reporting into a single weekly report.
- Centralized all reporting into common operations.
- Executed AWS migration, consolidating data operations across all auction facilities.
- Implemented LLMs in development and QA workflows, enhancing speed and documentation accuracy.
- Achieved a 50% reduction in AR through improved analytics and reconciliation automation.
- Designed third-party integration architecture utilizing AWS publish/subscribe micro-services.

Senior Vice President (Reporting to CFO)

10/2019 – 04/2023

Pareteum Corp — Irving, TX

- Facilitated technical aspects of M&A activity through sale to Circles Life.
- Served as executive lead for global billing operations and cybersecurity.
- Consolidated six global billing platforms and deployed Oracle ERP Web.
- Selected and implemented CrowdStrike MDR for over 1,500 servers.
- Oversaw GDPR/CCPA compliance and managed Data Protection Officer activities.
- Managed the telecom SaaS platform provider (MVNO, IoT, WiFi).
- Directed infrastructure, development, QA, and cybersecurity across the US, Europe, and India.
- Consolidated operations of sister companies into a unified AWS architecture.
- Drove ERP and billing platform unification, reducing licensing costs by \$300K annually.
- Administered the NIST framework for cybersecurity compliance during the transition.

Chief Operating Officer

07/2017 – 03/2019

Karma — Irving, TX

- Facilitated technical aspects of M&A activity through sale of Karma to Red Pocket.
- Managed data operations for a nationwide hotspot customer base.
- Delivered the 'Karma Black' VPN-based WiFi hotspot product while reducing staffing costs.
- Developed an IoT roadmap and integrated online billing platform.

Chief Operating Officer

08/2003 – 03/2017

Verify Systems, Inc. — Dallas, TX

- Architected a multi-billion-transaction cloud platform with 99.999% uptime.
- Migrated queuing from RabbitMQ to AWS Kinesis Firehose and Lambda.
- Provided back-office services to US-based telecommunications SaaS service providers.
- Implemented offshore development and customer support operations in India and Latin America.
- Built a SIP-based wholesale telecom startup to \$5M monthly revenue within two years.
- Developed and deployed real-time traffic monitoring and billing systems.
- Negotiated contracts with AT&T, British Telecom, Sprint, Tata, Deutsche Telekom, Telecom Italia, China Telecom, Chungwa Telecom, Bezeq, Telmex, and Bell Canada.
- Awarded two U.S. patents for data transformation and targeting.

Chief Information Officer

08/2002 – 08/2003

CCC Globalcom — Houston, TX

- Facilitated sale of Local Exchange customer-base.
- Facilitated the purchase of calling card customers in Florida.
- Directed operational downsizing initiatives for Board oversight during the company sale period.
- Decreased technical staff by 75%, ensuring continuous data operation integrity.
- Developed customer-based data asset packages and support systems to boost the sale price and facilitate a smooth transition.

VP, Application Engineering

07/1998 – 12/1999

Vocaltec — Fort Lee, NJ

- Managed nationwide executive customer communications pertaining to product necessities and possibilities.
- Headed sales engineering and was the direct link to the development division.
- Primary expert on the company's largest initiative (Bell Atlantic \$25M) and finalized the premier technology alliance (Cisco).
- Supervised the RFP response team for all key national accounts. Received Employee of the Year honors in 1998.

Senior Executive Consultant

05/1997 – 08/1998

Digital Equipment Corporation — Dallas, TX

- Provided C-level consulting services to major communications clients nationwide, including AT&T, MCI, and Metromedia.
- Served as the primary resource on MCI's "Callcenter 2000" project, defining a 10-year call center strategy for MCI.
- Represented Digital Equipment at prominent product trade shows.

Senior Manager, Product Technology

12/1995 – 05/1997

Excel Communications — Dallas, TX

- Led the definition and development of technology products catering to 4 million customers and 400,000 independent representatives; the company achieved the fastest time to \$1 billion in revenue and initial public offering on the NYSE.
- Enabled a 19% monthly growth rate during peak periods of expansion.
- Successfully launched a nationwide paging product within 6 months, encompassing all customer locations.
- Achieved a 75% reduction in customer onboarding duration.
- Acted as a representative for the technology teams in working groups dedicated to the management of storage, server systems, and monitoring solutions organization-wide.

EDUCATION**B.B.A., Business Information Systems** — Stephen F. Austin State University, Nacogdoches, TX (1984 – 1988)**U.S. PATENTS AWARDED****Text Normalization** — US 20100257172

SKILLS

- AI / LLM Integration (ChatGPT, Claude, Crew.AI, YOLO, Grok, ClawBot)
- Enterprise Refactoring & Cloud Transformation (AWS / Azure)
- ERP / CRM Modernization (Oracle ERP, Salesforce, Zoho)
- Cybersecurity / NIST Frameworks / CrowdStrike MDR
- GDPR / CCPA Compliance
- Computer Vision (YOLO) / NVIDIA GPU Libraries / Optical Subsystems
- Data Center Strategy & Platform Unification
- M&A Integration / Private Equity Fund Raises / Public IPO Roadshow
- Budget & P&L Oversight / Board-Level Reporting
- SIP-based Wholesale Telecom / Real-time Billing Systems
- Python, Perl, Java
- AWS Publish/Subscribe Micro-services
- IoT Roadmap & Online Billing Platform Integrations
- Global Team Leadership / Offshore Development Management
- Executive Communication / C-Level Advisory
- SOC Technical Audits / Security Administration
- Expert Witness / RFP Submission
- AI Transformation / AI-Driven Innovation
- Thought-Leadership / Executive Engagements
- Business Strategy Alignment / Operational Accountability
