Daily Model Brief, October 27, 2026

OpenAI launched GPT-6.1 Terra at half the price of GPT-6.1 Sol. No other token price I could confirm changed since Monday, and two deadlines land Saturday: DeepSeek starts billing Search and Fetch calls, and Moonshot closes K2 models to new accounts.

Tuesday, October 27, 2026 · Prices as of 8:45 AM CT · Covers Monday, October 26 through this morning

Executive Summary

OpenAI launched GPT-6.1 Terra on Monday afternoon, after Monday's brief went out. `gpt-6.1-terra` costs $1.00 input, $0.05 cached and $5.00 output per million tokens, exactly half of GPT-6.1 Sol ($2.00 / $0.10 / $10.00), which is unchanged. It has a 1,050,000-token context window and up to 128,000 output tokens.

Terra's list price is not the whole bill. Prompts over 272,000 input tokens bill the full request at 2x the input and cache rates and 1.5x the output rate. Cache writes cost $1.25 per million tokens for 30-minute retention or $2.50 for 12-hour retention. Fast mode costs 2x, Batch and Flex cost 50% less, and regional processing adds 10%.

No token price changed since Monday's brief on any other model I track at Anthropic, OpenAI, Google, xAI (Grok), Moonshot, Z.ai, MiniMax, Mistral, Alibaba, Cohere, Meta, TypeSafe, Xiaomi, StepFun or Perplexity.

Two deadlines land this Saturday, October 31. At 11:00 AM CT, DeepSeek starts billing Search and Fetch calls made through DeepSeek Harness, Claude Code and Codex. The same day, Moonshot stops letting newly registered accounts use its K2 models, ahead of retiring them by the end of December.

OpenAI reworded its deprecations page, folding the October 23 fine-tune shutdowns into the base-model schedule. No shutdown dates changed.

Not confirmed today: Amazon, ByteDance and Tencent prices, DeepSeek's dollar prices (its yuan prices are unchanged), IBM's model list, and Microsoft, which lists no pay-as-you-go prices. Their last confirmed prices stand. Performance scores in the chart are as of October 16 and have not been refreshed since.

What This Means for Customers

- If you use `gpt-6.1-sol`, test `gpt-6.1-terra` on the same work: every token price is half. Check output quality before you switch.
- If you still use the older `gpt-5.6-terra` ($2.00 input, $0.20 cached, $12.00 output), `gpt-6.1-terra` costs less on all three. The two names differ only in the version number, so check which one your code calls.
- Before you budget Terra, check your prompt sizes. A request over 272,000 input tokens bills entirely at the higher long-context rate, not just the part above the line.
- If your agents search the web through DeepSeek Harness, Claude Code or Codex, DeepSeek starts billing those Search and Fetch calls at 11:00 AM CT on Saturday, October 31, at $0.75 per 1,000 successful requests each (last confirmed dollar price). Track this separately from token spend.
- If you run `kimi-k2.6` or `kimi-k2.7-code`, plan the move off K2 before the end of December. Any new Moonshot account you open from October 31 will not be able to use K2.
- If you still run `gpt-4.1` or `gpt-4.1-mini`, shutdown is January 14, 2027, and the replacement is `gpt-6-luna`.
- Claude Haiku 4.5 is still active. Anthropic lists its retirement as not sooner than October 15, 2026, a date that has passed, and still sets no date. Keep a tested fallback ready.

New Models and Price Changes

Prices in USD per 1M tokens.

Vendor	Model ID	Status	Input	Cached	Output
OpenAI	`gpt-6.1-terra`	New (launched Mon Oct 26, afternoon). 1,050,000-token context. Cache writes: $1.25 (30-minute) or $2.50 (12-hour). Prompts over 272K input tokens: 2x input and cache, 1.5x output, for the whole request.	$1.00	$0.05	$5.00
OpenAI	`gpt-6.1-sol`	Unchanged. Terra costs half on every line.	$2.00	$0.10	$10.00
OpenAI	`gpt-5.6-terra`	Unchanged. Older model; not the same as gpt-6.1-terra.	$2.00	$0.20	$12.00
Moonshot	`kimi-k3.1-pro`	Unchanged. Cache writes: $2.00 (5-minute) or $4.00 (1-hour).	$2.00	$0.20	$10.00
Moonshot	`kimi-k3.1-pro-highspeed`	Unchanged. Cache writes: $4.00 (5-minute) or $8.00 (1-hour).	$4.00	$0.20	$20.00
Moonshot	`kimi-k3`	Unchanged.	$3.00	$0.30	$15.00
Moonshot	`kimi-k2.7-code`	Unchanged. Closed to new accounts from Oct 31; retiring by end of December.	$0.95	$0.19	$4.00
Moonshot	`kimi-k2.6`	Unchanged. Closed to new accounts from Oct 31; retiring by end of December.	$0.95	$0.16	$4.00
Google	`gemini-3.8-flash (also serves gemini-3.7-flash)`	Unchanged through Dec 31; $1.50 / $0.15 / $7.50 from Jan 1, 2027.	$0.75	$0.075	$3.75
Alibaba	`qwen3.8-27b`	Unchanged (International).	$0.50	Not listed	$3.00
Alibaba	`qwen3.8-max`	Unchanged.	$2.00	Not listed	$6.00
MiniMax	`MiniMax-M3.1-Flash`	Unchanged.	$0.15	$0.015	$0.60
Mistral	`mistral-large-4`	Unchanged at list price.	$1.36	$0.14	$4.18
Meta	`muse-spark-1.3`	Unchanged (Standard mode).	$1.25	$0.15	$4.25
Cohere	`Command R+ 08-2024 (legacy)`	Unchanged. No cached-token price published.	$2.50	Not listed	$10.00
DeepSeek	`deepseek-v4-pro`	Off-peak price, last confirmed. Yuan prices unchanged today; dollar prices not confirmed today.	$0.66	$0.022	$1.98
DeepSeek	`Search API / Fetch API`	Billing for calls through DeepSeek Harness, Claude Code and Codex starts Sat Oct 31, 11:00 AM CT. $0.75 per 1,000 successful requests each (last confirmed dollar price).	Per request	Not applicable	Per request
Tencent	`Hy3`	Last confirmed price. Not confirmed today.	$0.132	$0.033	$0.528
TypeSafe	`jev-1.14.0`	Unchanged. jev-latest points here. Output free.	$0.042	Not listed	Free
IBM	`granite-4-h-small`	Last confirmed price. Not confirmed today.	$0.0636	Not listed	$0.265

- GPT-6.1 Terra is the only new public price since Monday's brief. No other token price I could confirm changed.
- Terra's long-context rule applies to the whole request: a 300,000-token prompt bills every input token at $2.00 per million, not just the tokens past 272,000.

- Z.ai still marks cached input storage as limited-time free, and Xiaomi still marks cache writes as limited-time free; neither gives an end date.
- Prices from Amazon, ByteDance and Tencent could not be confirmed today, IBM's model list could not be confirmed, and Microsoft lists no pay-as-you-go prices. Their last confirmed prices stand, unverified today.

Deprecations

Vendor	Model ID	Shutdown (CT)	Replacement	Note
OpenAI	`gpt-3.5-turbo-0125`, `gpt-4-0613`, `gpt-4-1106-preview`, `gpt-4-turbo`, `gpt-4o-2024-05-13`, `o1`, `o1-pro`, `o3-mini`, `o4-mini`, `gpt-4.1-nano`, `gpt-image-1` (and fine-tuned versions)	Fri Oct 23, 2026 (passed)	`gpt-5.6-sol` `gpt-5.6-terra` `gpt-5.6-luna` `gpt-image-2.5-sunburst` or `gpt-image-2.5-flare`	Shut down. OpenAI reworded this entry; no date changed.
Google	`gemini-3.7-flash`	No shutdown	`gemini-3.8-flash`	Google routes API requests to gemini-3.8-flash automatically, at the same price.
Moonshot	`kimi-k2.6` `kimi-k2.7-code` (all K2 models)	By end of December 2026 (no exact date)	`kimi-k3.1-pro`	Unchanged. Closed to newly registered accounts from Sat Oct 31; existing accounts keep access until retirement.
Google	`gemini-3.1-flash-tts-preview` `gemini-2.5-flash-preview-tts` `gemini-2.5-pro-preview-tts`	Tue Nov 17, 2026 (time not stated)	`gemini-3.8-flash-tts` or `gemini-3.8-flash-lite-tts`	Unchanged.
Google	`gemini-3.1-flash-live-preview` `gemini-2.5-flash-native-audio-preview-12-2025`	Tue Nov 17, 2026 (time not stated)	`gemini-3.8-live`	Unchanged.
Microsoft (Azure)	`Llama-4-Maverick-17B-128E-Instruct-FP8`	Thu Nov 19, 2026 (time not stated)	None named	Unchanged.
Anthropic	`claude-sonnet-4-5-20250929`	Mon Nov 30, 2026 (time not stated)	`claude-sonnet-5-5`	Unchanged.
Microsoft (Azure)	`Ministral-3B` `mistral-medium-2505`	Wed Dec 9, 2026 (time not stated)	`ministral-ministral-4b-instruct` `mistral-medium-3-5`	Unchanged. Applies to Azure deployments, not Mistral's own API.
OpenAI	`gpt-4.1` `gpt-4.1-mini` `gpt-4o-2024-08-06` `gpt-4o-2024-11-20` `gpt-4o-mini-2024-07-18`	Wed Jan 13, 2027, 6:00 PM CT	`gpt-6-luna`	Unchanged. OpenAI lists Jan 14, 2027 with no time; 6:00 PM CT Jan 13 is 00:00 UTC Jan 14.
Microsoft (Azure)	`Llama-3.3-70B-Instruct`	Sun Jan 31, 2027 (time not stated)	None named	Unchanged.
Microsoft (Azure)	`cohere-command-a` `mistral-small-2503`	Mon Feb 15, 2027 (time not stated)	`Cohere-command-a-plus-05-2026` `mistralai-mistral-small-4-119b-2603`	Unchanged.
OpenAI	`gpt-5.4-nano` `gpt-5.4-nano-2026-03-17`	Thu Apr 1, 2027 (time not stated)	`gpt-6-luna`	Unchanged. Also retiring that day: gpt-5.3-codex and gpt-5.1, with gpt-6-sol as their replacement.
Microsoft (Azure)	`Kimi-K2.6` `Kimi-K2.7-Code`	Fri Apr 16, 2027 (time not stated)	None named	Unchanged. Azure's date is later than Moonshot's own K2 retirement.

Vendor	Model ID	Shutdown (CT)	Replacement	Note
Microsoft (Azure)	`embed-v-4-0`	Tue Jun 1, 2027 (time not stated)	`Cohere-embed-v5-fast`, `Cohere-embed-v5-pro`	Unchanged.
Microsoft (Azure)	`Cohere-rerank-v4.0-fast` `Cohere-rerank-v4.0-pro`	Mon Sep 13, 2027 (time not stated)	`Cohere-rerank-v5-fast` `Cohere-rerank-v5-pro`	Unchanged.
Microsoft (Azure)	`gpt-oss-120b`	Wed Sep 15, 2027 (time not stated)	`None named`	Unchanged.
Microsoft (Azure)	`DeepSeek-V3.2` `DeepSeek-V3.2-Speciale`	Mon Nov 1, 2027 (time not stated)	`DeepSeek-V4.1-Flash` `DeepSeek-V4-Pro`	Unchanged.
Anthropic	`claude-haiku-4-5-20251001`	Not sooner than Thu Oct 15, 2026; no date set	`None named`	Watch item. Still active with no date set.
Cohere	`command-r` `command-r-plus`	Deprecated Sep 15, 2025; no shutdown date set	`command-r-08-2024` `command-r-plus-08-2024` `command-a-03-2025`	Closed to new customers; existing users keep access until retirement.

- No new retirement and no moved shutdown date since Monday's brief at any vendor I track.
- OpenAI's transcription notice is unchanged: whisper-1, gpt-4o-transcribe, gpt-4o-mini-transcribe, gpt-4o-transcribe-diarize and the /v1/audio/translations endpoint shut down February 26, 2027.
- Moonshot still gives a month, not a day, for the K2 retirement, so treat December 1 as the safe planning date.

Price Tracker

Shares of the full tracked population.

- Tracked models: 1,934 (count as of October 25).
- Audited pricing, confirmed against the vendor's own published prices: 13.1% of the full tracked population.
- Unaudited pricing: 5.3%.
- The rest have no public per-token price (47.6%: self-hosted open weights, retired or unpublished) or are duplicate listings of another tracked model (34.0%).

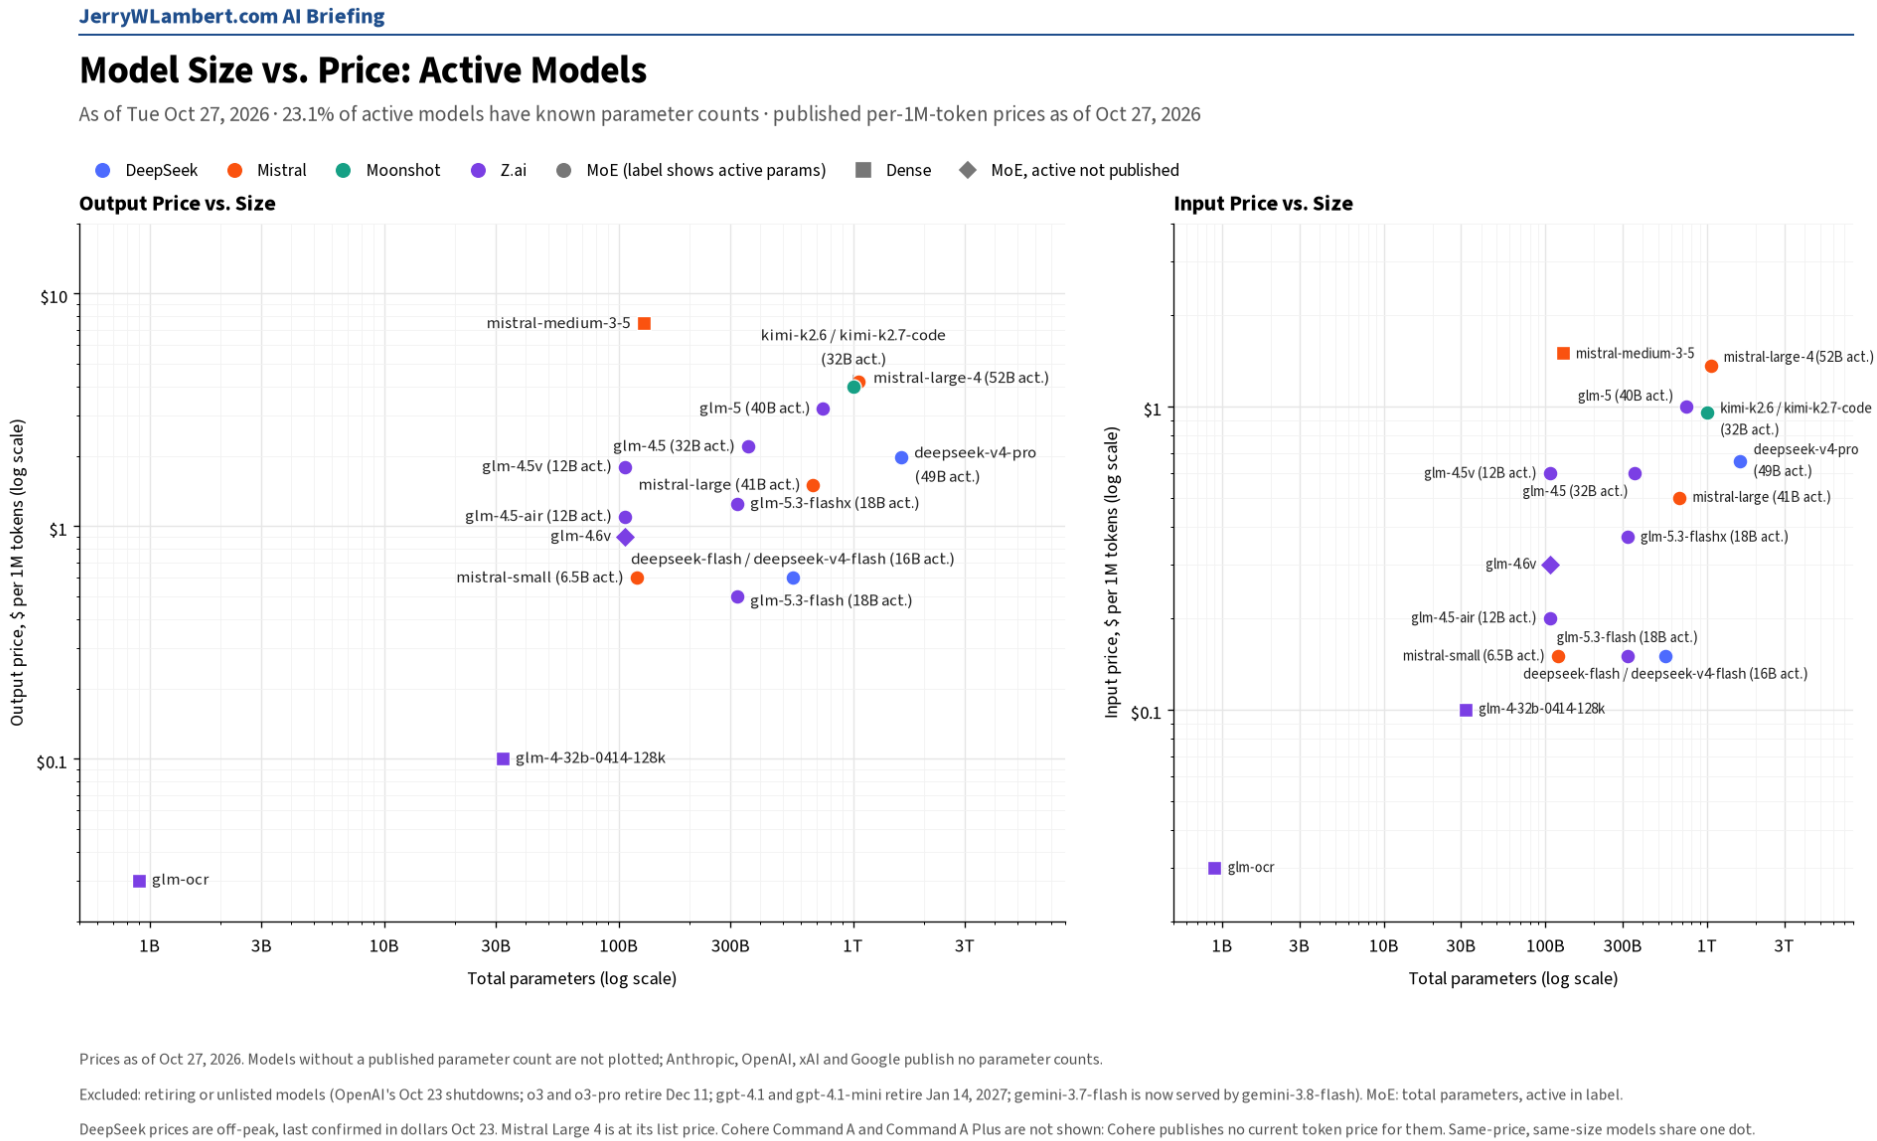

Agent Platforms

Hosted AI agents that come with their own persistent cloud computer.

- **Grok Bot (xAI)**: its own persistent cloud computer; access is included in paid plans and draws from a weekly usage pool. Release v0.75.8 (October 24) lets a bot offer to add, change or remove one of your approval rules on a card you confirm, cuts approval prompts further, lets connectors pick up new tools without reconnecting, and limits Team Bots to people on the share list. No plan price change.
- **dots (OpenAI)**: not verified today. Last confirmed: a dot "has its own cloud computer," and the first comes with Pro and Business Premium at no extra cost.
- **Muse (Meta)**: "You and your Muse share your own dedicated computer in the cloud." Runs on Muse Spark 1.3, whose API price is unchanged at $1.25 input, $0.15 cached and $4.25 output per million tokens. Billing is unverified today.
- **Manus**: the Cloud Computer add-on is a persistent server billed separately at $30 a month (2 vCPUs, 4 GB RAM, 70 GB storage) or $50 a month (2 vCPUs, 8 GB RAM, 120 GB storage). No change.
- **Genspark Claw**: runs "on a dedicated cloud computer provisioned just for you," which requires a Lite, Standard or Powerful Cloud Computer subscription; Genspark publishes no dollar amounts. No price change.

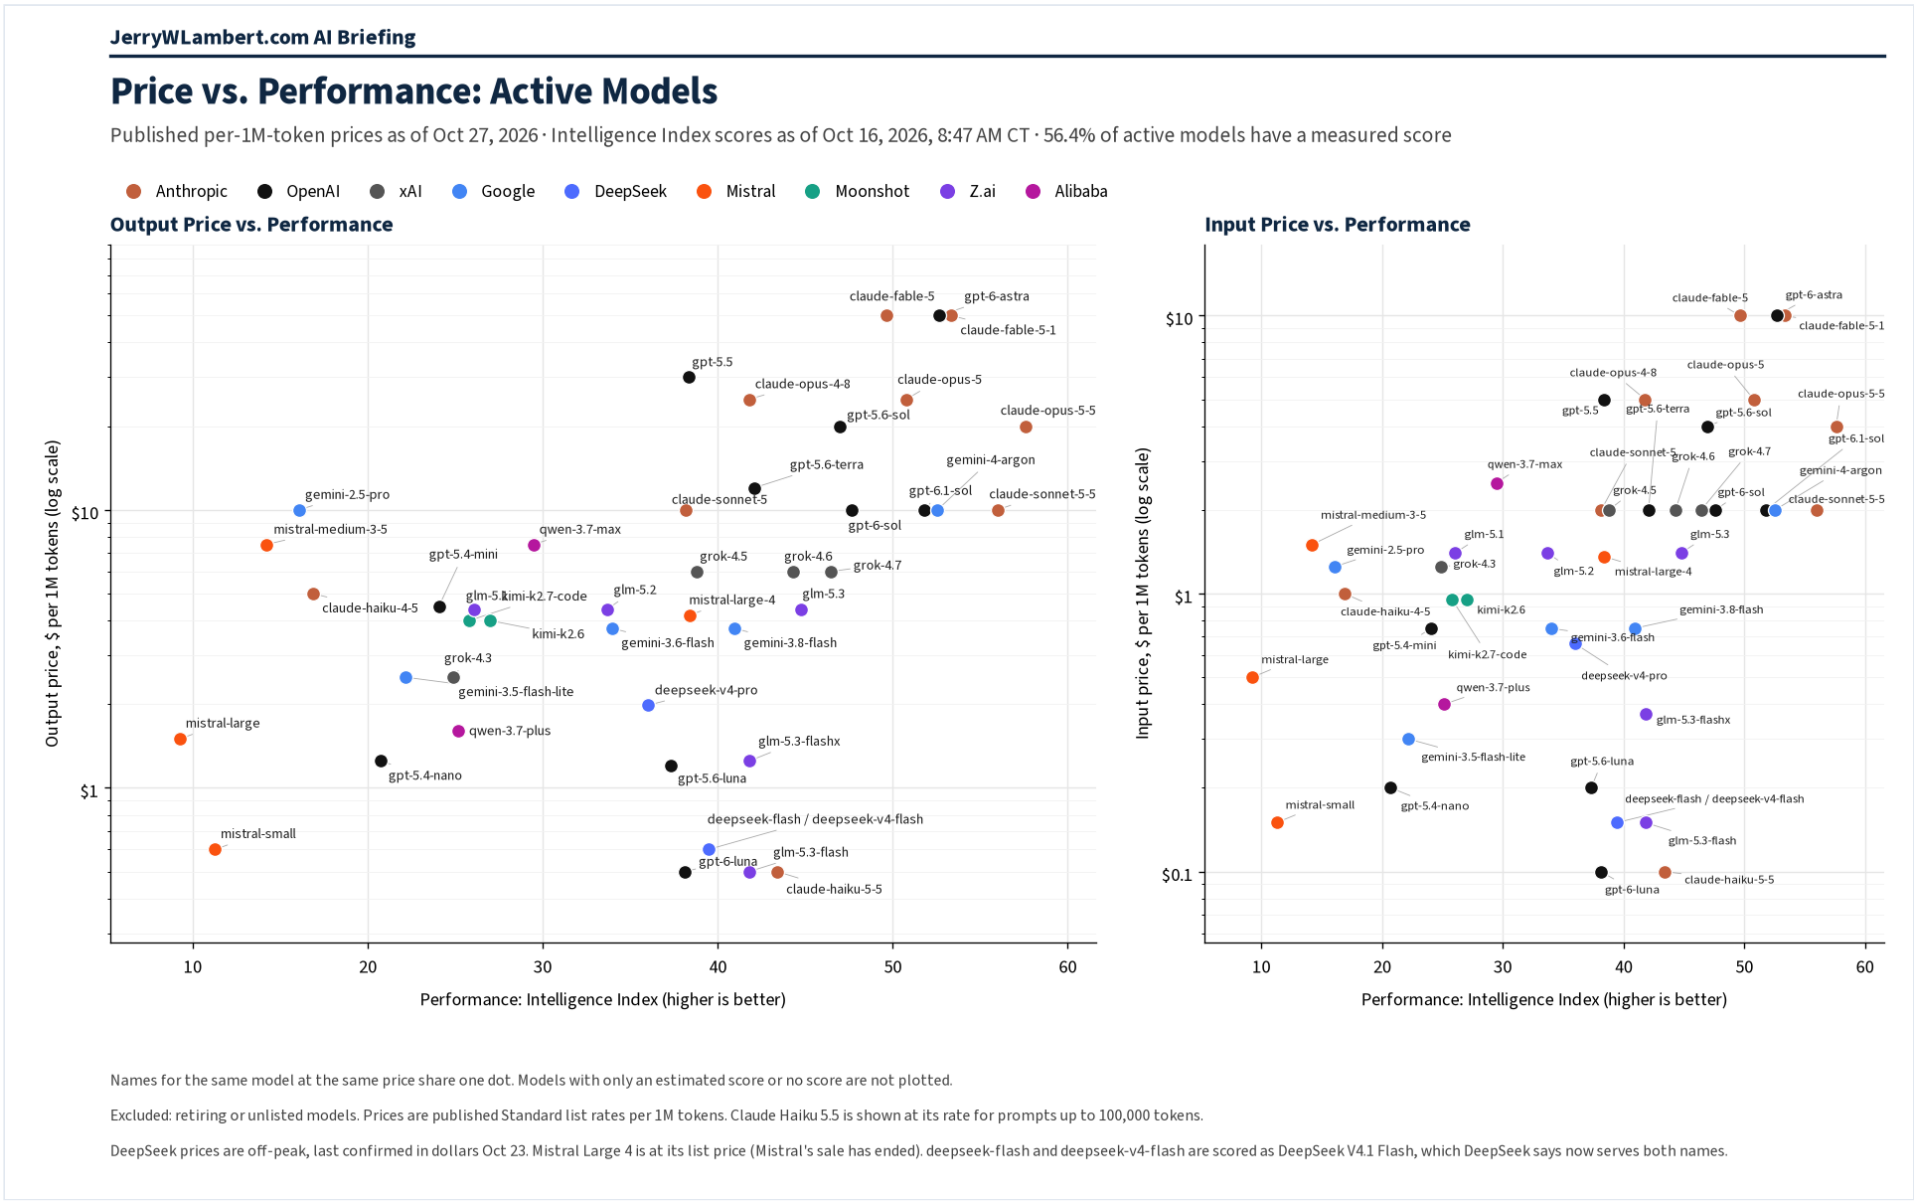

All times Central. Vendor prices, dates and model IDs are as of 8:45 AM CT on October 27, 2026. Chart prices are as of October 27, 2026. Performance scores are as of October 16, 2026 and have not been refreshed since. Price Tracker percentages are shares of the full tracked population; chart percentages are shares of active models. Items that could not be confirmed are marked unverified.
© 2026 Jerry W. Lambert Sr.

Model Size vs. Price

Among active models with a known parameter count (23.1% of active models), price rises with total size (rank correlation 0.62 on output price). Anthropic, OpenAI, xAI and Google publish no parameter counts, so their models are not plotted. No plotted price changed since Monday. Prices as of October 27, 2026.

Price vs. Performance

Among active models with a performance score (56.4% of active models), price rises with performance only loosely (rank correlation 0.49 on output price). Claude Haiku 5.5 leads at $0.50 or less (43.4). At the frontier, Gemini 4 Argon scores 52.6 and GPT-6.1 Sol 51.8, each at $10 output, while xAI's Grok 4.7 scores 46.5 at $6. Scores as of October 16, 2026 (not refreshed since); prices as of October 27, 2026.
