Daily Model Brief, November 4, 2026

No vendor changed a standard list price on a tracked model since Tuesday. Tencent listed its new Hy4 model at the preview price with a 50% discount through December 31, and Google will route requests for Gemini 2.5 Pro and 2.5 Flash to newer models from December 1.

Wednesday, November 4, 2026 · Prices as of 8:30 AM CT · Covers Tuesday, November 3 through this morning

Executive Summary

No vendor I track changed a standard list token price on a publicly available model since Tuesday's brief.

Tencent now lists Hy4 (`hy4`) as a production model next to Hy4 Preview. Tencent's documentation shows the same list price as the preview, $0.834 input, $0.042 cached and $2.501 output per million tokens, and bills Hy4 at 50% of list through the end of December 31, 2026, Beijing time (9:59 AM CT on Thursday, December 31). Tencent does not say when the discount started or whether it covers the preview, and its main price list could not be confirmed today.

Google deprecated Gemini 2.5 Pro (`gemini-2.5-pro`) and Gemini 2.5 Flash (`gemini-2.5-flash`) in a Monday, November 2 notice. From Tuesday, December 1, API requests to `gemini-2.5-pro` route automatically to `gemini-3.8-flash` and requests to `gemini-2.5-flash` route to `gemini-3.5-flash-lite`, each billed at the new model's rates. Neither can be selected in Google AI Studio any longer, and `gemini-2.5-flash-lite` is not affected.

Moonshot moved `kimi-k2.7-code`, `kimi-k2.7-code-highspeed` and `kimi-k2.6` to its deprecated list. They are closed to newly registered accounts, and retirement is expected in late December 2026, still with no exact date.

DeepSeek's pages no longer mention a free period for its Search and Fetch APIs. Both bill at $0.75 per 1,000 successful requests, including Search and Fetch calls made through DeepSeek Harness, Claude Code and Codex.

Dates coming up: StepFun starts billing its StepAudio 3 voice models at 10:00 AM CT on Sunday, November 8. Google shuts down several preview speech and live audio models on Tuesday, November 17, Microsoft retires Llama 4 Maverick on Azure on Thursday, November 19, and fast mode for Claude Opus 4.8 is removed on Monday, November 30.

Items from earlier briefs still stand: Anthropic's message threads beta, which Anthropic says does not change pricing; Mistral Medium 3.5 (`mistral-medium-3-5`) and Mistral Large 3 (`mistral-large-2512`) retire on Friday, April 30, 2027; OpenAI's limited-access GPT-6 Rosalind and GPT-6 Astra for Law are listed at the same prices; and OpenAI's 10% uplift on FedRAMP endpoints continues.

Not confirmed today: Amazon, ByteDance and Tencent prices, Moonshot's per-search web search prices, IBM's model list, and Microsoft, which lists no pay-as-you-go prices. Their last confirmed prices stand. Performance scores in the chart are still as of October 16 and have not been refreshed since.

What This Means for Customers

- If you call `gemini-2.5-pro`, test `gemini-3.8-flash` before Tuesday, December 1, and review Google's breaking API changes for it. At today's list prices the routed requests cost less per token ($0.75 input and $3.75 output through December 31, against 2.5 Pro's $1.25 and $10.00 for prompts up to 200K tokens), but 3.8 Flash rises to $1.50 and $7.50 on January 1, 2027.
- If you call `gemini-2.5-flash`, requests move to `gemini-3.5-flash-lite` on December 1 at the same text list price ($0.30 input, $0.03 cached, $2.50 output). Test the new model first.
- If you are trying Tencent Hy4, usage through December 31 bills at half of list price. Tencent gives no start date for the discount, so check that it appears on your bill.

- If you build on StepFun's StepAudio 3 voice models, the free period ends at 10:00 AM CT on Sunday, November 8. Realtime speech then bills at $0.125 per session minute, and any partial minute bills as a full minute.
- If you still call `gemini-3.1-flash-tts-preview` or the preview live audio models, move to `gemini-3.8-flash-tts` or `gemini-3.8-live` before Tuesday, November 17.
- If your agents search the web through DeepSeek Harness, Claude Code or Codex, those Search and Fetch calls bill at $0.75 per 1,000 successful requests each. Keep them in a budget separate from token spend.
- If you still use Moonshot's K2 models, plan the move to `kimi-k3.1-pro` by December 1. New accounts cannot use K2, and Moonshot expects to retire it in late December without an exact date yet.
- If you use fast mode on `claude-opus-4-8`, those requests will return an error after November 30. Move fast-mode work to `claude-opus-5-5`, or drop the fast setting.
- If you still call `mistral-medium-3-5` or `mistral-large-2512`, they keep working until April 30, 2027. Test `mistral-large-4` now at $0.70 input and $2.10 output per million tokens.

New Models and Price Changes

Prices in USD per 1M tokens.

Vendor	Model ID	Status	Input	Cached	Output
Tencent	`hy4`	New production listing next to Hy4 Preview, same list price per Tencent's documentation. Billed at 50% of list through Dec 31 (Beijing time); start date not stated. Main price list not confirmed today.	$0.834	$0.042	$2.501
Google	`gemini-2.5-pro`	Deprecated (notice Mon Nov 2). From Tue Dec 1, requests route to gemini-3.8-flash and bill at its rates. Prices shown are for prompts up to 200K tokens.	$1.25	$0.125	$10.00
Google	`gemini-2.5-flash`	Deprecated (notice Mon Nov 2). From Tue Dec 1, requests route to gemini-3.5-flash-lite, whose text prices are the same.	$0.30	$0.03	$2.50
DeepSeek	`Search API / Fetch API`	Billing live. The free period for calls through DeepSeek Harness, Claude Code and Codex is no longer mentioned. $0.75 per 1,000 successful requests each.	Per request	Not applicable	Per request
Anthropic	`Message threads (beta)`	Unchanged since Tuesday. Anthropic says pricing and rate limits do not change.	No change	No change	No change
OpenAI	`gpt-6-rosalind`	Unchanged. Limited to organizations approved for life sciences research. Cache writes: $18.75 (30-minute) or $37.50 (12-hour).	$15.00	$1.50	$75.00
OpenAI	`gpt-6-astra-law`	Unchanged. Promotional price through at least Dec 31.	$10.00	$1.00	$50.00
OpenAI	`FedRAMP endpoints`	In effect since Nov 1: 10% uplift on token prices. Standard global endpoint unchanged.	+10%	+10%	+10%
StepFun	`stepaudio-3-realtime`	Unchanged. Free until Sun Nov 8, 10:00 AM CT; then $0.125 per session minute, partial minutes billed as full minutes.	Per minute	Not applicable	Per minute

Vendor	Model ID	Status	Input	Cached	Output
StepFun	`stepaudio-3-tts`	Unchanged. Free until Sun Nov 8, 10:00 AM CT; then $14.00 per million billable input characters. Voice cloning or design: $1.50 per voice.	Per character	Not applicable	Not applicable
Mistral	`mistral-large-4`	Unchanged. Named replacement for Mistral Medium 3.5 and Mistral Large 3. No cache-write price published.	$0.70	$0.07	$2.10
DeepSeek	`deepseek-flash (also serves deepseek-v4-flash)`	Off-peak price; unchanged. Peak-hour prices are double.	$0.15	$0.003	$0.60
DeepSeek	`deepseek-v4-pro`	Off-peak price; unchanged. Peak-hour prices are double.	$0.66	$0.022	$1.98
OpenAI	`gpt-6.1-terra`	Unchanged. Cache writes: $1.25 (30-minute) or $2.50 (12-hour). Prompts over 272K input tokens: 2x input and cache, 1.5x output, for the whole request.	$1.00	$0.05	$5.00
OpenAI	`gpt-6.1-sol`	Unchanged. Terra costs half on every line.	$2.00	$0.10	$10.00
Google	`Grounding with Google Search (Gemini 3 and newer)`	Unchanged. Daily cap of 1,500 requests; 5,000 free searches a month, then $14 per 1,000.	Per request	Not applicable	Per request
Moonshot	`Web search (Responses API and Kimi K3 built-in tool)`	Terms unchanged. Billed per search the server runs, plus model tokens. Per-call prices still not displayed; not confirmed.	Per call	Not applicable	Per call
Moonshot	`kimi-k3.1-pro`	Unchanged (standard rate). Cache writes: $2.00 (5-minute) or $4.00 (1-hour).	$2.00	$0.20	$10.00
Moonshot	`kimi-k2.7-code`	Unchanged price. Now listed as deprecated; closed to new accounts; retirement expected late December.	$0.95	$0.19	$4.00
Moonshot	`kimi-k2.6`	Unchanged price. Now listed as deprecated; closed to new accounts; retirement expected late December.	$0.95	$0.16	$4.00
Google	`gemini-3.8-flash (also serves gemini-3.7-flash)`	Standard tier unchanged through Dec 31; $1.50 / $0.15 / $7.50 from Jan 1, 2027. Replacement for gemini-2.5-pro from Dec 1.	$0.75	$0.075	$3.75
Alibaba	`qwen3.8-max`	Unchanged.	$2.00	Not listed	$6.00
MiniMax	`MiniMax-M3.1-Flash`	Unchanged.	$0.15	$0.015	$0.60
Meta	`muse-spark-1.3`	Unchanged (Standard mode).	$1.25	$0.15	$4.25
Tencent	`Hy3`	Last confirmed Monday. Not confirmed today. No cache-write price published.	$0.132	$0.033	$0.528
TypeSafe	`jev-1.14.0`	Unchanged. jev-latest points here. Output free.	$0.042	Not listed	Free
IBM	`granite-4-h-small`	Last confirmed price. Not confirmed today.	$0.0636	Not listed	$0.265

- No standard list token price changed on a generally available model since Tuesday's brief at any vendor I could confirm. Tencent's Hy4 is a new listing at the preview's price.

- Prices match the last confirmed figures at Anthropic, OpenAI, Google, xAI (Grok), DeepSeek, Moonshot, Z.ai, MiniMax, Mistral, Alibaba, Cohere, Meta, TypeSafe, Xiaomi, StepFun and Perplexity.
- Prices from Amazon, ByteDance and Tencent could not be confirmed today (Tencent's Hy4 figures come from its documentation, not its main price list), Moonshot's per-search prices did not display, IBM's model list could not be confirmed, and Microsoft lists no pay-as-you-go prices. Their last confirmed prices stand, unverified today.

Deprecations

Vendor	Model ID	Shutdown (CT)	Replacement	Note

Moonshot	`kimi-k2.6`
	`kimi-k2.7-code`
	`kimi-k2.7-code-highspeed`
	`(all K2 models)`
		Late December 2026 (no exact date)	`kimi-k3.1-pro`	Now listed as deprecated. Closed to newly registered accounts; existing accounts keep access until retirement.

Google	`gemini-3.1-flash-tts-preview`
	`gemini-2.5-flash-preview-tts`
	`gemini-2.5-pro-preview-tts`
		Tue Nov 17, 2026 (time not stated)	`gemini-3.8-flash-tts or gemini-3.8-flash-lite-tts`	Unchanged.

Google	`gemini-3.1-flash-live-preview` `gemini-2.5-flash-native-audio-preview-12-2025`	Tue Nov 17, 2026 (time not stated)	`gemini-3.8-live`	Unchanged.
Microsoft (Azure)	`Llama-4-Maverick-17B-128E-Instruct-FP8`	Thu Nov 19, 2026 (time not stated)	`None named`	Unchanged.
Anthropic	`claude-opus-4-8 (fast mode only)`	Mon Nov 30, 2026 (time not stated)	`claude-opus-5-5 (fast mode)`	Unchanged. Fast-mode requests to claude-opus-4-8 will return an error after removal.
Anthropic	`claude-sonnet-4-5-20250929`	Mon Nov 30, 2026 (time not stated)	`claude-sonnet-5-5`	Unchanged.
Google	`gemini-2.5-pro` `gemini-2.5-flash`	Tue Dec 1, 2026 (time not stated)	`gemini-3.8-flash` `gemini-3.5-flash-lite`	New. Requests route automatically to the replacement and bill at its rates. gemini-2.5-flash-lite is not affected.
Microsoft (Azure)	`Ministral-3B` `mistral-medium-2505`	Wed Dec 9, 2026 (time not stated)	`ministral-ministral-4b-instruct` `mistral-medium-3-5`	Unchanged. Applies to Azure deployments, not Mistral's own API.

OpenAI	`gpt-5`
	`gpt-5-mini`
	`gpt-5-nano`
	`gpt-5-pro`
	`o3`
	`o3-pro (dated snapshots)`
		Fri Dec 11, 2026 (time not stated)	`gpt-5.6-sol`
			`gpt-5.6-terra`
			`gpt-5.6-luna`
				Unchanged. gpt-5 and o3 move to gpt-5.6-sol, gpt-5-mini to gpt-5.6-terra, gpt-5-nano to gpt-5.6-luna, and gpt-5-pro and o3-pro to gpt-5.6-sol in pro reasoning mode.

OpenAI	`gpt-4.1`
	`gpt-4.1-mini`
	`gpt-4o-2024-08-06`
	`gpt-4o-2024-11-20`
	`gpt-4o-mini-2024-07-18`
		Wed Jan 13, 2027, 6:00 PM CT	`gpt-6-luna`	Unchanged. OpenAI lists Jan 14, 2027 with no time; 6:00 PM CT Jan 13 is 00:00 UTC Jan 14.

Microsoft (Azure)	`gpt-4o (version 2024-05-13)`	Thu Jan 14, 2027 (time not stated)	`gpt-5.1 (version 2025-11-13)`	Unchanged. Applies to Azure deployments, not OpenAI's own API.
Microsoft (Azure)	`Llama-3.3-70B-Instruct`	Sun Jan 31, 2027 (time not stated)	`None named`	Unchanged.

Vendor	Model ID	Shutdown (CT)	Replacement	Note
Microsoft (Azure)	`cohere-command-a` `mistral-small-2503`	Mon Feb 15, 2027 (time not stated)	`Cohere-command-a-plus-05-2026` `mistralai-mistral-small-4-119b-2603`	Unchanged.
OpenAI	`gpt-5.4-nano` `gpt-5.4-nano-2026-03-17`	Thu Apr 1, 2027 (time not stated)	`gpt-6-luna`	Unchanged. Also retiring that day: gpt-5.3-codex and gpt-5.1, with gpt-6-sol as their replacement.
Microsoft (Azure)	`Kimi-K2.6` `Kimi-K2.7-Code`	Fri Apr 16, 2027 (time not stated)	`None named`	Unchanged. Azure's date is later than Moonshot's own K2 retirement.
Mistral	`mistral-medium-3-5` `mistral-large-2512`	Fri Apr 30, 2027 (time not stated)	`mistral-large-4`	Unchanged. Deprecated Sat Oct 31; still callable until retirement. Prices no longer listed.

Microsoft (Azure)	`Cohere-rerank-v4.0-fast` `Cohere-rerank-v4.0-pro`	Mon Sep 13, 2027 (time not stated)	`Cohere-rerank-v5-fast` `Cohere-rerank-v5-pro`	Unchanged.
Microsoft (Azure)	`gpt-oss-120b`	Wed Sep 15, 2027 (time not stated)	`None named`	Unchanged.
Microsoft (Azure)	`DeepSeek-V3.2` `DeepSeek-V3.2-Speciale`	Mon Nov 1, 2027 (time not stated)	`DeepSeek-V4.1-Flash` `DeepSeek-V4-Pro`	Unchanged.
Anthropic	`claude-haiku-4-5-20251001`	Not sooner than Thu Oct 15, 2026; no date set	`None named`	Watch item. Still active with no date set.

Cohere	`command-r`
	`command-r-plus`
		Deprecated Sep 15, 2025; no shutdown date set	`command-r-08-2024`
			`command-r-plus-08-2024`
			`command-a-03-2025`
				Closed to new customers; existing users keep access until retirement.

- Microsoft also pushed Azure retirement for gpt-5-mini (version 2025-08-07) and gpt-5.1 (version 2025-11-13) out to July 13, 2027. These Azure dates do not change OpenAI's own API dates.
- OpenAI's transcription notice is unchanged: whisper-1, gpt-4o-transcribe, gpt-4o-mini-transcribe, gpt-4o-transcribe-diarize and the /v1/audio/translations endpoint shut down February 26, 2027.

Price Tracker

Shares of the full tracked population.

- Tracked models: 1,934 (count as of October 25).
- Audited pricing, confirmed against the vendor's own published prices: 13.1% of the full tracked population.
- Unaudited pricing: 5.3%.
- The rest have no public per-token price (47.6%: self-hosted open weights, retired or unpublished) or are duplicate listings of another tracked model (34.0%).

Agent Platforms

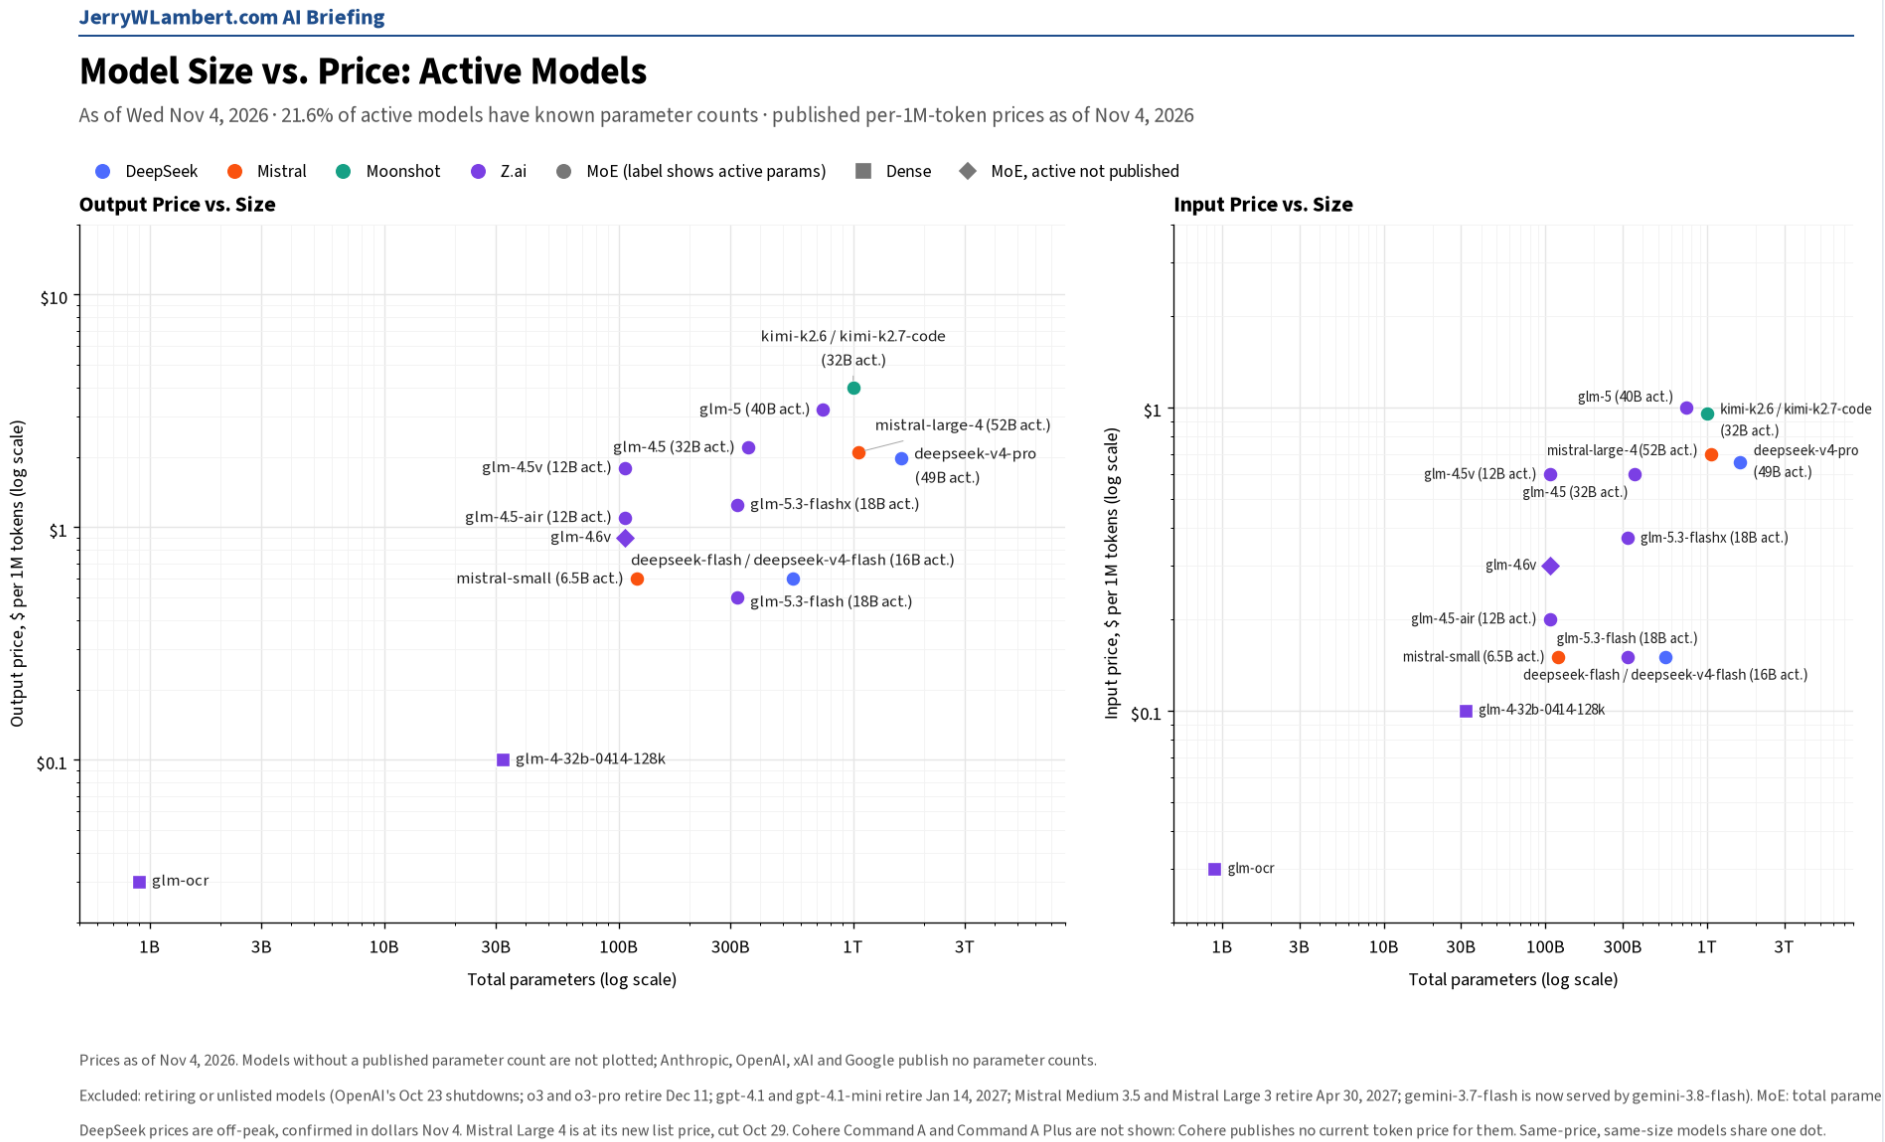

Hosted AI agents that come with their own persistent cloud computer.

- **Grok Bot (xAI)**: its own persistent cloud computer. On the X Subscription it is included on Premium, Super and Ultra, draws from the same weekly usage pool as Cursor and the Grok apps, and prepaid credit covers usage past the pool. No change since Tuesday: the latest release is still v0.78.1 (dated October 27), and plan prices are unchanged.
- **dots (OpenAI)**: not verified today. Last confirmed: a dot "has its own cloud computer," and the first comes with Pro and Business Premium at no extra cost.

- **Muse (Meta)**: "You and your Muse share your own dedicated computer in the cloud." Runs on Muse Spark 1.3, whose API price is unchanged at $1.25 input, $0.15 cached and $4.25 output per million tokens. Billing is unverified today.
- **Manus**: the Cloud Computer add-on is a persistent server billed separately at $30 a month (2 vCPUs, 4 GB RAM, 70 GB storage) or $50 a month (2 vCPUs, 8 GB RAM, 120 GB storage). No change.
- **Genspark Claw**: runs "on a dedicated cloud computer provisioned just for you," which requires a Lite, Standard or Powerful Cloud Computer subscription; Genspark publishes no dollar amounts. Its help pages were reorganized; no change to pricing.

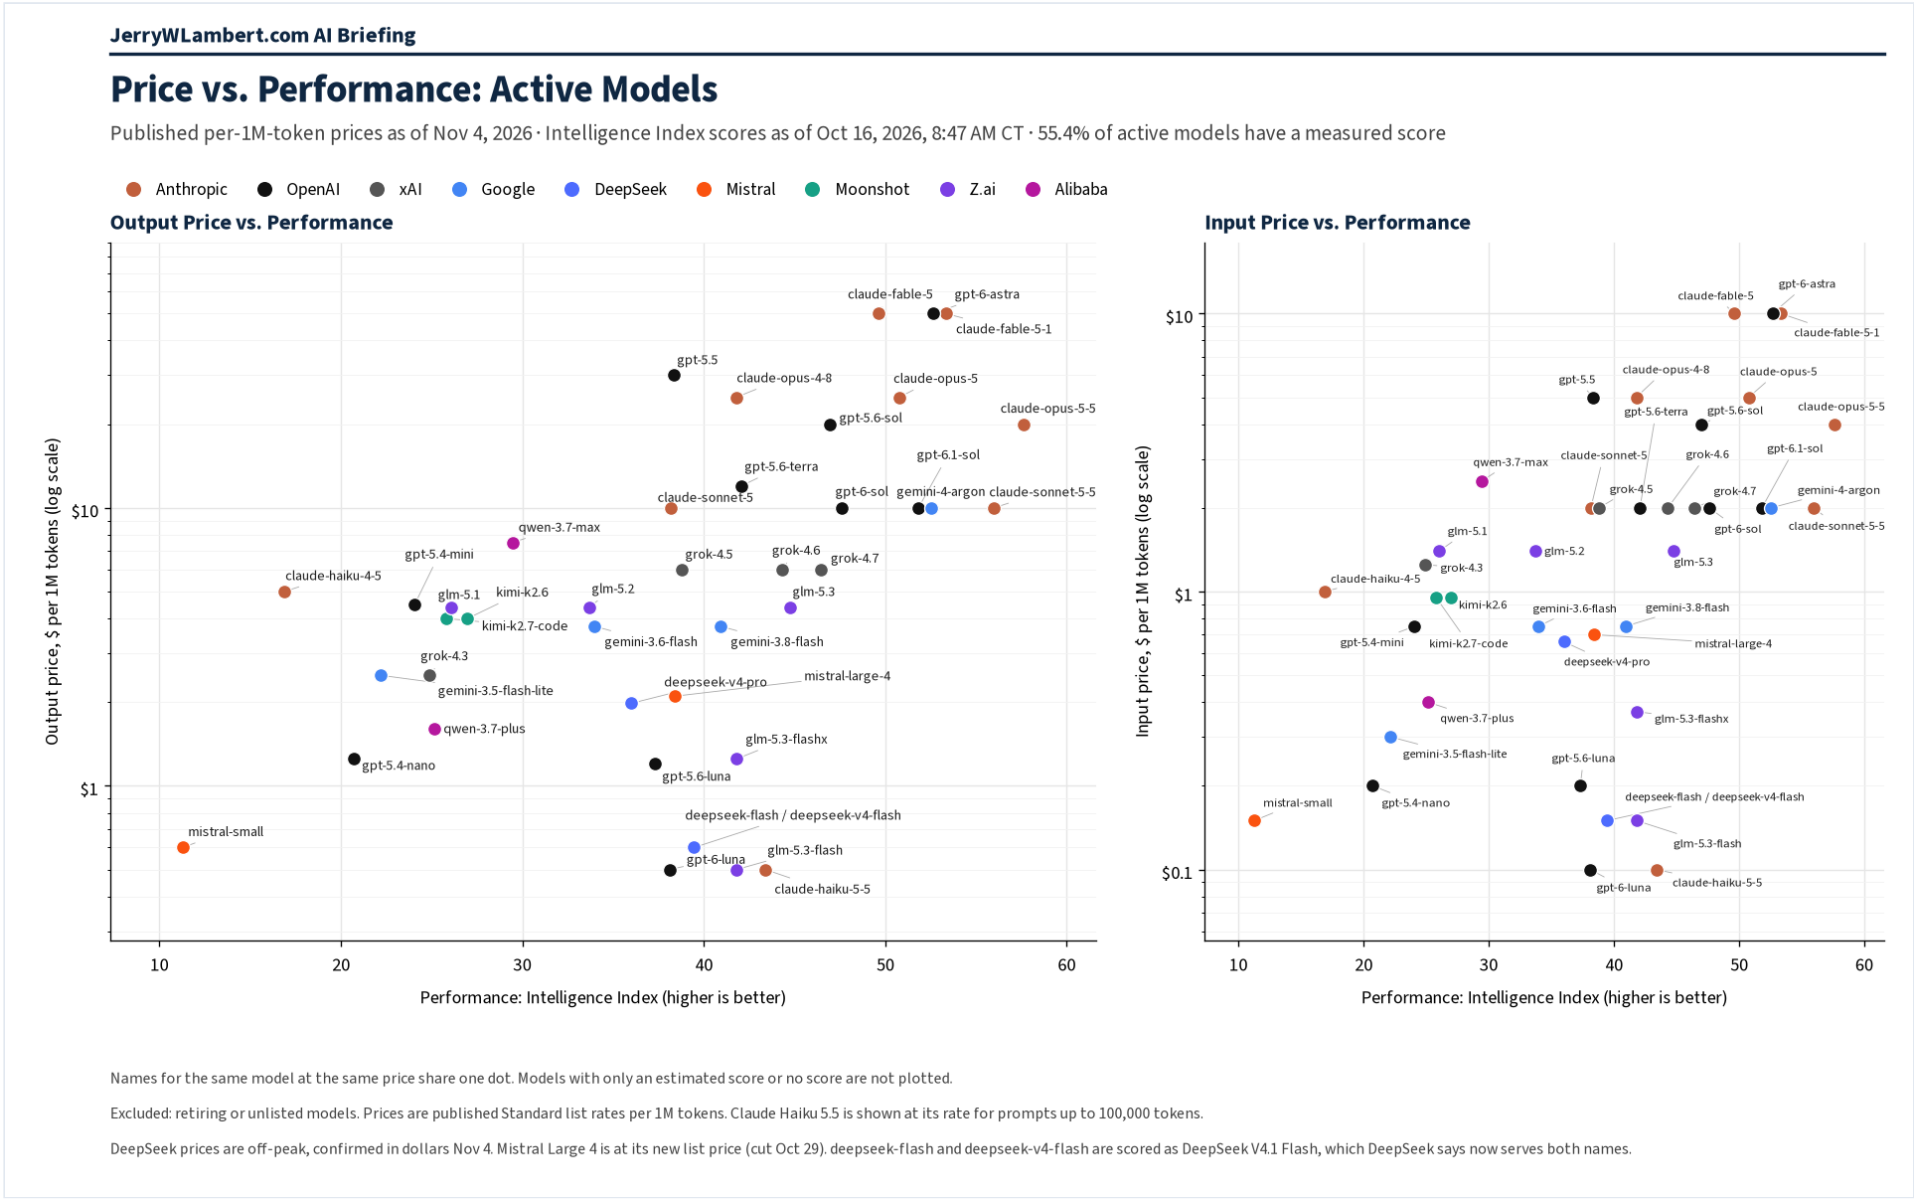

All times Central. Vendor prices, dates and model IDs are as of 8:30 AM CT on November 4, 2026. Chart prices are as of November 4, 2026. Performance scores are as of October 16, 2026 and have not been refreshed since. Price Tracker percentages are shares of the full tracked population; chart percentages are shares of active models. Items that could not be confirmed are marked unverified.
© 2026 Jerry W. Lambert Sr.

Model Size vs. Price

Among active models with a known parameter count (21.6% of active models), price rises with total size (rank correlation 0.69 on output price). No plotted price changed since Tuesday. Anthropic, OpenAI, xAI and Google publish no parameter counts, so their models are not plotted. Gemini 2.5 Pro and 2.5 Flash, now retiring, are no longer counted as active in either chart. Prices as of November 4, 2026.

Price vs. Performance

Among active models with a performance score (55.4% of active models), price rises with performance only loosely (rank correlation 0.55 on output price). Claude Haiku 5.5 leads at $0.50 or less (43.4). At the frontier, Gemini 4 Argon scores 52.6 and GPT-6.1 Sol 51.8, each at $10 output, while xAI's Grok 4.7 scores 46.5 at $6. Scores as of October 16, 2026 (not refreshed since); prices as of November 4, 2026.
